*Nadine Carmon, CEO/ Founder*  
*Break the Cycle Foundation*

### DESIGNATED LIAISON FROM ANY OTHER ENTITY DEEMED APPROPRIATE BY THE EXECUTIVE COMMITTEE

*Christopher Welch, CLAS/ Health Equity Consultant*

## EXECUTIVE SUMMARY

Since our inception in 2015, the role of the Charleston County Criminal Justice Coordinating Council is to assist in making sustainable, data-driven improvements to Charleston County's criminal justice system and thereby improve public safety and community well-being.

This year's Annual Report will look a bit different from past reports. You will find new data sets and presentations as we strive to make the information more easily digestible. Be assured, the data is all there, and as always, the numbers speak for themselves.

As the previous Annual Reports have done, we continue to review local system functions, which include **Jail Use**, trends in **Arrests, Diversion, and Deflection** efforts, **Bond and Reentry** practices, and **Case Processing**. This report incorporates data spanning between 2014 and 2023, as we examine the overall impacts and system response to the COVID-19 pandemic in our area.

Since 2014 we have been monitoring Jail Use including length of stay and daily populations in the various courts. Following an overall reduction in the local jail population since the launch of the CJCC's efforts, we are now observing more fluctuations and increases. Demographics continue to reflect jail use is predominately Male, within the 25-34 Age Group category. In 2023, the Average Daily Population consisted of 656 Black Adults, 288 White Adults, 19 Hispanic Adults, 4 Indian Adults, 2 Asian Adults, 2 Adults where Race was not captured, and 1 each of Native American, Pacific Islander, and Unknown.

Like 2022, Unlawful Carrying of a Firearm remains the most frequently booked charge for the third year in a row with a total of 841 warrants in 2023. DUI 1st and General Sessions & Probate Contempt ranked second and third most frequent respectfully. Arrests, Diversion and Deflection data reflects the four largest law enforcement agencies in Charleston County (Charleston Police Department, North Charleston Police Department, Mount Pleasant Police Department, and Charleston County Sheriff's Office) continue to represent most of the jail use among law enforcement agencies, 90% of detention activity for 2023. We saw an increase in referrals to the Tricounty Stabilization Center and Triage Services, from 212 in 2020, to 383 in 2023.

Bond Court data shows 4,108 effective bonds in 2023, of those 1,295 were Pure PR and 2,813 were Financial Driven. Also, in 2023 the overall average effective bond amount was \$34,806.89. Of significance, Charleston County remains the only County in South Carolina where Pretrial Service Reports are routine, and Public Defenders represent defendants who have less than \$500.00 cash when arrested at their first Bond Court Hearing. Like 2022, the data again shows that a minority, (42.1%) of pretrial releases return to jail on a Safety and/or Appearance failure and most re-arrest occur within six months of pretrial release. The Case Processing data shows the number of cases filed increased from 7,292 in 2022 to 7,985 in 2023. In 2023 the rate of charges disposed to charges filed (clearance rate) surpassed 100% to 106.40%.

This report underscores our ongoing commitment to accountability and transparency. I encourage community members to review the findings, stay engaged with us, and continue to work with us to confront the challenges ahead. Moving forward, the CJCC will develop its 2025 Strategic Plan combining community priorities with data findings and best practices from around the country. We will continue to improve, learn, and never veer from our vision to create a criminal justice system that improves public safety, upholds justice, and cost-effectively uses taxpayers' dollars.

*Ellen S. Steinberg, J.D.*

Charleston County  
Criminal Justice Coordinating Council

# REPORT OVERVIEW

## READING THE REPORT

The **Charleston County Criminal Justice Coordinating Council (CJCC) Annual Report** provides an account of progress made to improve the local justice system through **data transparency**. Including initiatives identified through support of committee members and stakeholders, data contained in this report is resourced through the CJCC centralized data warehouse and related databases unless noted otherwise.

As emphasized in prior annual reports, data constructs are fluid, as information pertaining to cases evolve and/or expungement occurs. Such dynamic changes - to include changes to disposition codebooks, arrest/charge descriptions, and differences in booking procedures - will be reflected in minor differences when comparing static year-to-year reporting.

In utilizing information present in this report, readers should be sensitive to factor definitions, data parameters, limitations of data, and the appropriate application and interpretation of figures. The CJCC Annual Report also highlights **Community Engagement** efforts, which stem from a direct application of data obtained through it's valuable partners.

## CONTRIBUTING DATA SOURCES (17 Total)

**Law Enforcement:** Charleston County Sheriff's Office (CCSO), Charleston Police Department (CPD), North Charleston Police Department (NCPD), Mount Pleasant Police Department (MPPD), and College of Charleston Public Safety.

**Summary Courts:** Charleston County Magistrates (CMS-Mag), Charleston Municipal Court, North Charleston Municipal Court, and Mount Pleasant Municipal Court.

**General Sessions:** Charleston County Clerk of Court (CMS-GS), Ninth Circuit Solicitor, Charleston County (Prosecution by Karpel, PbK), Ninth Circuit Public Defender, Charleston County (Defender Data, DD).

**Jail:** Charleston County Sheriff's Office, Sheriff Al Cannon Detention Center (SACDC).

**Pretrial:** Pretrial Services Database (PSD)

**Community Based Services:** Charleston Dorchester Mental Health Department (CDMHC)

## Jail Use - Average Daily Population

# Jail Use

Jail Use data is sourced from the Sheriff Al Cannon Detention Center (SACDC) and includes the following:

- Average Daily Population
- Admissions and Releases
- Average Length of Stay
- Charges by Court Type

The average daily population (ADP) is a measurement of the jail population. The ADP is derived from monthly snapshot files taken from the first of the month and averaged. Local ADP is the sum of the pretrial and sentenced population, and excludes uses of the jail by non-local jurisdictions such as the federal government or other counties (i.e. HOLD).

Consistent with improvements to the local criminal justice system, an overall reduction in the local jail population has been observed since the launch of the CJCC's efforts. Though overall reductions in local jail use have occurred since 2014, increases are now being observed.

Average Daily Population by Population Type

Note. Overall figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition.

## Jail Use - Average Daily Population

ADP by Race

2023 ADP by Age Group

2023 ADP by Gender

Demographics surrounding Average Daily Population numbers are gathered from booking information when provided.

In 2023, the Average Daily Population was reported to be predominately Male (897) and within the 25-34 Age Group category (304 or 31.2% of all ages).

Overtime, minor fluctuations have been noted regarding Race representation. In 2023, the Average Daily Population consisted of 656 Black Adults, 288 White Adults, 19 Hispanic Adults, 4 Indian Adults, 2 Asian Adults, 2 Adults where Race was not captured, and 1 each of Native American, Pacific Islander, and Unknown.

It should be noted that Race is based upon data entry methods and does not derive from individual self-reporting.

Note. Age is only available from 2020 onward. Overall figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition.

### Jail Use - Local Admissions

The term "**local**" for jail population data is used to exclude circumstances when the Detention Center may be used for non-local jurisdictions, such as the federal government or non-Charleston County agencies. A **booking** refers to the process in which information is entered to create an official arrest record.

An individual may be admitted into the jail on multiple charges or bookings, and each of these categories are reflected within the Annual Report. In 2023, the total number of bookings (10,349) saw a **20.2% increase** from 2022. These bookings consist predominately of Males (79%), Ages 25-34 (32%), and were identified as Black (55%) or White (41%).

Total Booking by Age Category

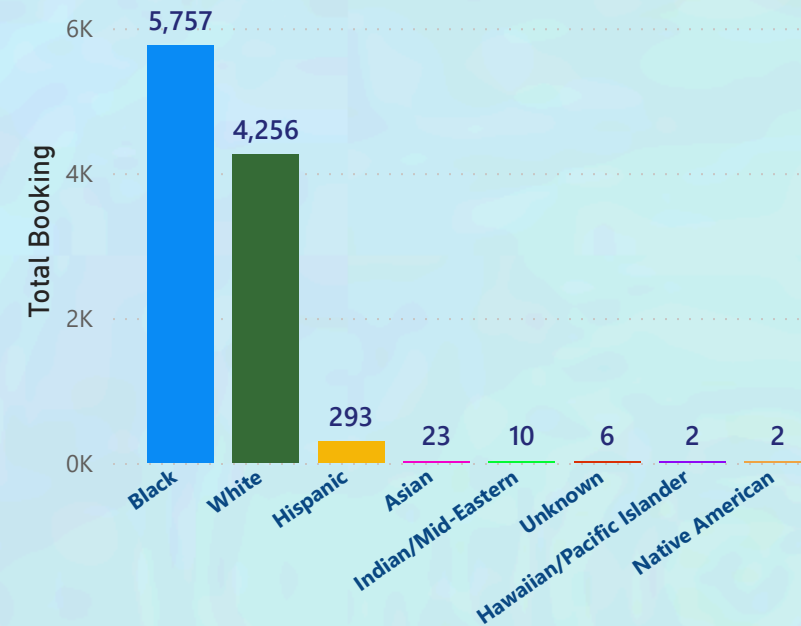

2023 Local Bookings by Gender

Total Local Bookings by Year

2023 Local Bookings by Race

Note. Overall figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition.

## Jail Use - Local Charges

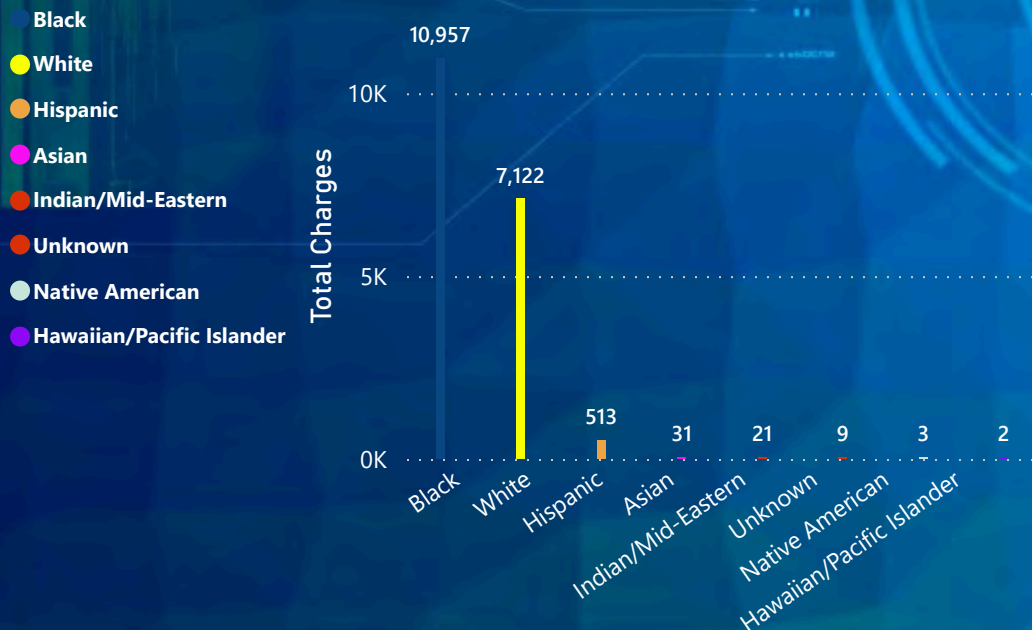

Total Charges by Year

The term "**local**" for jail population data is used to exclude circumstances when the Detention Center may be used for non-local jurisdictions, such as the federal government or non-Charleston County agencies.

A **charge** refers to the formal accusation of criminal activity that an individual is alleged to have committed. A charge must be proven in court, and is not indicative of guilt.

2023 Charges by Race

2023 Charges by Gender

2023 Total Charges by Age Category

Note. Overall Figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition.

## Jail Use - Total People

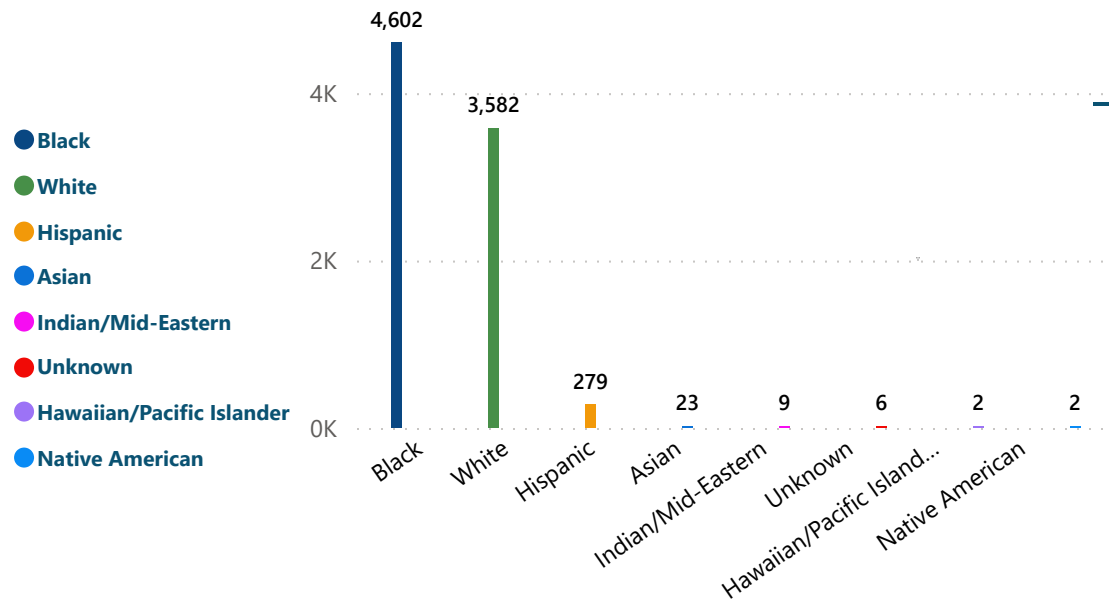

As previously noted, an individual may be admitted into jail on multiple charges or bookings. Thus, reviewing jail activity through unique individuals that are admitted is extremely helpful in determining the use of the Detention Center in Charleston County.

In 2023, 8,502 individuals were admitted into jail - this is an overall **decrease of 60.5%** since 2014. However, consistent with other trends (i.e. bookings, charges), end of year figures have surpassed pre-pandemic numbers.

Total People by Year

2023 People by Race

2023 People by Age Category

2023 People by Gender

Note. Overall Figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition.

Average Length of Stay in Days - All Population

### Jail Use - Average Length of Stay

Average Length of Stay (ALOS) is reported in Days. ALOS calculations are based on the number of unique adult bookings released in 2023. Averages can be impacted by outliers, for example individuals released who experienced a substantial length of stay.

In 2023, the ALOS for the total jail population was 31 days. Males held were for longer periods of time (35 days), and no significant contrasts were noted between Age categories. Regarding Race, those released in 2023 with the highest average length of stay were recorded as Indian ("I" 109 days) and Pacific Islander (P, 159).

2023 Average Length of Stay by Gender

Average LOS by Race

Pretrial Population Group

**30 DAYS**

Sentenced Population Group

**33 DAYS**

Average LOS by Age Category

Note. Overall Figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition. Race categories are generated from Jail Entry methods rather than self-identification.

### Jail Use - Charges by Court

Charges by Court

| Year | Summary Court | General Sessions Court | Family Court | Probation & Parole | Drug Court | Mental Health Court | Other |
|------|---------------|------------------------|--------------|--------------------|------------|---------------------|-------|
| 2023 | 7,008         | 10,077                 | 469          | 196                | 25         | 18                  | 865   |
| 2022 | 4,798         | 9,234                  | 404          | 306                | 47         | 25                  | 878   |
| 2021 | 3,754         | 9,026                  | 241          | 359                | 37         | 9                   | 827   |
| 2020 | 3,794         | 8,856                  | 338          | 451                | 25         | 15                  | 1,411 |
| 2019 | 5,860         | 9,930                  | 737          | 540                | 38         | 25                  | 3,491 |
| 2018 | 8,121         | 10,660                 | 671          | 487                | 50         | 27                  | 2,881 |
| 2017 | 13,606        | 12,534                 | 742          | 382                | 59         | 49                  | 3,114 |
| 2016 | 14,709        | 10,690                 | 967          | 243                | 49         | 35                  | 1,797 |
| 2015 | 18,600        | 10,522                 | 1,503        | 257                | 74         | 33                  | 1,479 |
| 2014 | 25,970        | 12,170                 | 1,425        | 379                | 66         | 48                  | 1,655 |

2023 Charges by Court

Charges by Court

Criminal offenses which are subject to a penalty of a fine less than \$500.00 or imprisonment not exceeding 30 days (or both) fall under the jurisdiction of **Summary Court**. CJCC data includes information from the following courts: Charleston Municipal, Folly Beach Municipal, Isle of Palms Municipal, Magistrate, Mount Pleasant Municipal, North Charleston Municipal, and Sullivan's Island Municipal.

In comparison, **General Sessions Court** has jurisdiction over misdemeanor or felony offenses that carry a sentence greater than 30 days and fines greater than \$500.

**Summary Court** and **General Sessions Court** charges comprise the majority of charges observed within the Charleston County Detention Center. In 2023, increases were seen in charges for both **General Sessions Court (10%)** and **Summary Court (46.2%)** from 2022.

Note. Overall Figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition.

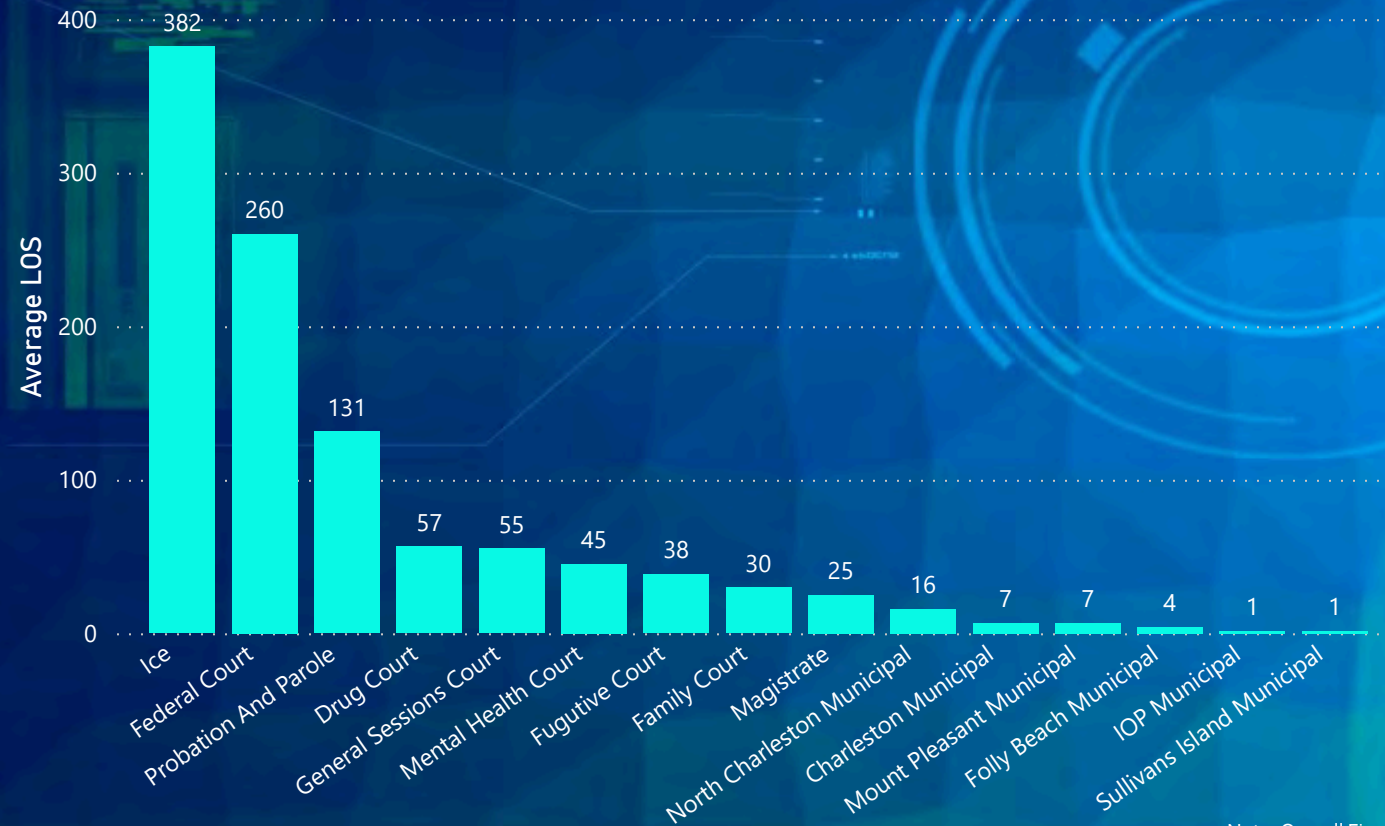

### Jail Use - Average Length of Stay by Court

Average Length of Stay (ALOS) is reported in Days. ALOS calculations are based on the number of unique adult bookings released in 2023. Averages can be impacted by outliers, for example individuals released that year who experienced a substantial length of stay.

#### Average LOS in Days by Court Type

Release Year ● 2023

**General Sessions  
Court  
55 DAYS**

**Summary  
Court  
12 DAYS**

Historically, CJCC reports have identified the average length of stay for Federal charges and Holds to be consistently higher compared to other Courts at the Detention Center. In 2023, the average length of stay for Federal Court for those released in 2023 was **260 days**.

Summary Court average length of stay is based on the average of all local courts which meet the criteria of charges with impending fines less than \$500 and/or imprisonment not exceeding 30 days. In 2023, the Summary Court average length of stay was **12 days**.

Note. Overall Figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition.

# ARRESTS, DIVERSION, & DEFLECTION

The follow section examines data surrounding arrest, diversion, and deflection trends in Charleston County. These data points derive from the front-end of the justice system process, and include key benchmarks from initial law enforcement interactions and detention alternative strategies.

**Arrest:** The act of taking or detaining someone in custody by legal authority.

**Diversion:** An alternative sentencing option that allows an individual charged with certain crimes to avoid a criminal conviction.

**Deflection:** A strategy to direct individuals away from the criminal justice system, usually an alternative path for support or treatment.

Sources from this section include: SCIBRS, Charleston County Sheriff's Office, Charleston Police Department, North Charleston Police Department, Mount Pleasant Police Department, College of Charleston Public Safety, Tri-County Crisis Stabilization Center (TCSC), and the Pretrial Services Database.

Note. Number of Crimes Reported is derived from the South Carolina Incident-Based Reporting System (SCIBRS) and the FBI National Incident-Based Reporting System (NIBRS) and have a delayed release. Annual numbers will marginally fluctuate based on case processing and reporting procedures.

## ARRESTS, DIVERSION, & DEFLECTION - SCIBRS

### CRIME CATEGORIES

**South Carolina Incident Based Reporting System (SCIBRS)** crime data are based on incident reports submitted by state and local law enforcement agencies to the State Law Enforcement Division (SLED). Offenses are classified according to the SCIBRS definitions rather than according to local ordinances, state statutes or federal statutes. SCIBRS collects in-depth data for Group A offenses, which are divided into three categories.

**Crimes Against Persons** (e.g., murder, rape, and assault) are those whose victims are always individuals.

**Crimes Against Property** (e.g., robbery, burglary, shoplifting) include crimes to obtain money, property or some other benefit.

**Crimes Against Society** (e.g., gambling, prostitution, drug violations, and weapons violations) represent society's prohibition against engaging in certain types of activity.

| Crimes Against Persons                       | Crimes Against Property                   | Crimes Against Society                   |
|----------------------------------------------|-------------------------------------------|------------------------------------------|
| Murder and Non-negligent Manslaughter        | Arson                                     | Drug/ Narcotic Violations                |
| Negligent Manslaughter                       | Burglary/ Breaking and Entering           | Drug Equipment Violations                |
| Kidnapping, Abduction                        | Destruction/ Damage/ Vandalism            | Betting/ Wagering                        |
| Forcible Rape                                | Counterfeiting/ Forgery                   | Operating/ Promoting/ Assisting Gambling |
| Forcible Sodomy                              | False Pretenses/ Swindle/ Confidence Game | Gambling Equipment Violations            |
| Sexual Assault with an Object                | Robbery                                   | Pornography/ Obscene Material            |
| Forcible Fondling                            | Shoplifting                               | Prostitution                             |
| Incest                                       | Theft from Building                       | Purchasing Prostitution                  |
| Statutory Rape                               | Theft from Motor Vehicle                  | Assisting/ Promoting Prostitution        |
| Aggravated Assault                           | Theft of Motor Vehicle Parts/ Accessories | Weapon Law Violations                    |
| Simple Assault                               | All Other Larceny                         | Animal Cruelty                           |
| Intimidation                                 | Motor Vehicle Theft                       |                                          |
| Human Trafficking/<br>Commercial Sexual Acts | And 12 Others                             |                                          |

**Arrests, Diversion, and Deflection - Crime Rates**  
**Crime Rate Comparisons (County vs. State) with SACDC Local Population Booking Rate**

Overall, crime rates reported have followed similar trends between South Carolina state and Charleston County. Since 2014, the overall local population booking rates have largely decreased, while reported Crimes Against Person, Property, and Society have remained relatively consistent through 2022. Figures released by the SCIBRS traditional experience a one-year delay.

For this graph, solid lines represent Charleston County numbers, while dotted lines represented South Carolina state numbers.

Note. Numbers derive from SCIBRS database and are reported in Crimes Per 1,000 Population. Local Population Booking Rate is calculated using the American Community Survey (United States Census Bureau).

### Arrests, Diversion, and Deflection - Charleston County Crime Rates

| Sum of Crime Numbers | Offense Type                         |
|----------------------|--------------------------------------|
| 6,941                | Larceny-Theft                        |
| 4,732                | Simple Assault                       |
| 1,777                | Motor Vehicle Theft                  |
| 1,573                | Aggravated Assault                   |
| 1,073                | Burglary/Breaking & Entering         |
| 343                  | Robbery                              |
| 48                   | Murder and Nonnegligent Manslaughter |

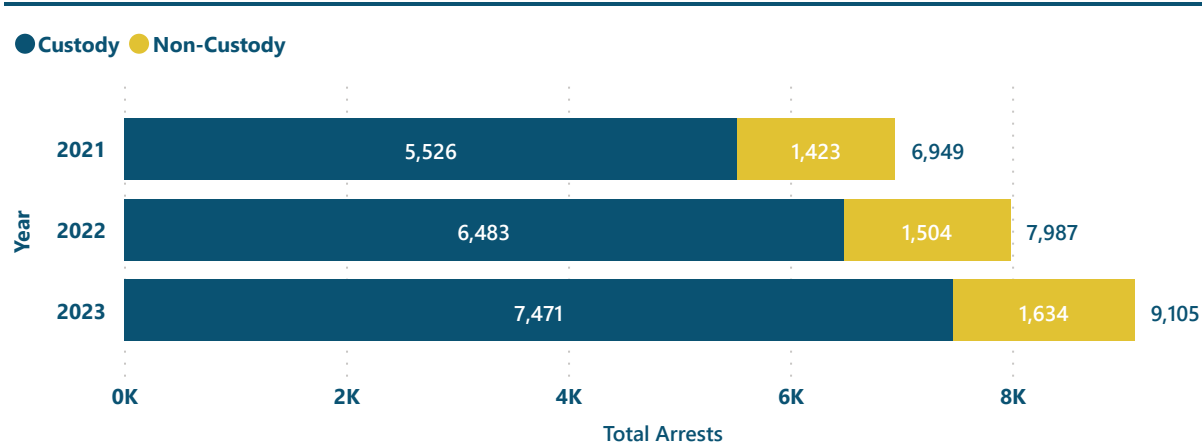

For **Charleston County**, Larceny-Theft crimes were the most reported in 2022 (6,941) followed by Simple Assault (4,732). Violent offenses, such as Robbery (343) and Murder/Nonnegligent Manslaughter (48) were reported less frequently.

Note. Numbers derive from the SCIBRS database and retrieved 2/28/2024

## Arrests, Diversion, and Deflection - Custodial and Non-Custodial Arrests

Total Arrests by Custody Type

Arrests may fall into one of two categories: **Custodial** and **Non-Custodial**.

A **Custodial Arrest** refers to a physical detention or confinement of an individual for a criminal offense in a jail or holding facility. A **Non-Custodial Arrest** occurs when there is a temporary detention of an individual, thus depriving a person of his/her liberty by legal authority, for the purpose of issuance of a citation or summons regarding a criminal activity.

Total Individuals Arrested by "Big 4" Agencies

Data indicates the four largest law enforcement agencies in Charleston County (Charleston Police Department, North Charleston Police Department, Mount Pleasant Police Department, and Charleston County Sheriff's Office), continue to represent most of the jail use among local law enforcement agencies.

Though additional local agencies utilize the detention center (to exclude Holds or non-local agency use), the "Big Four" represented **90%** of detention center activity **2023**.

## Arrests, Diversion, and Deflection - Custodial and Non-Custodial Arrests

In 2023, Custodial Arrests were reported more often than Non-Custodial Arrests. Figures are reported in counts of arrests and total percentage of arrests by the provided categories of Age, Gender, and Race.

### CUSTODIAL

Total Arrests by Age (Custodial)

Total Arrests by Gender (Custodial)

Total Arrests by Race (Custodial)

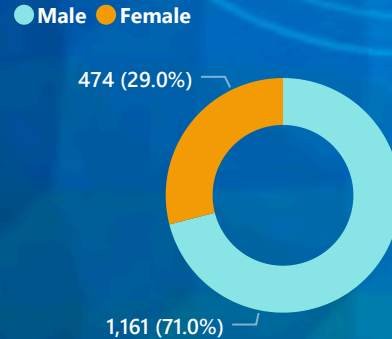

### NON-CUSTODIAL

Total Arrests by Age (Non-Custodial)

Total Arrests by Gender (Non-Custodial)

Total Arrests by Race (Non-Custodial)

Note. Race categories are derived from provided data sets and are not self-reported.

### Arrests, Diversion, and Deflection - Custodial Arrest Timeline

| Custodial Admissions by Week Day |               |              |
|----------------------------------|---------------|--------------|
| WeekDay                          | Total Inmates | % of Inmates |
| Sunday                           | 1,522         | 19%          |
| Monday                           | 1,492         | 19%          |
| Tuesday                          | 1,428         | 18%          |
| Wednesday                        | 1,192         | 15%          |
| Thursday                         | 1,179         | 15%          |
| Friday                           | 1,272         | 16%          |
| Saturday                         | 1,270         | 16%          |
| <b>Total</b>                     | <b>8,013</b>  | <b>100%</b>  |

**Custodial Arrests** in Charleston County result in an individual being admitted to the Detention Center to undergo a formal booking process. For this page, figures represent the person level, not the amount of charges or bookings. In 2023, admissions by week day were relatively consistent, with the highest percentage of admissions occurring on Sunday, Monday, and Tuesday (19% and 18%, respectively). Regarding time of day, admissions activity remained relatively constant throughout the day, with slightly higher increases observed during the evening hours.

**Detention Center Admissions by Time of Day**

Note. Figures represent jail admissions at the the person level for 2023, not the amount of charges or bookings. 21

## Most Frequently Occurring Charges Overall - Charge Description

The **Most Frequently Occurring Charges** provide a further glimpse into the type of activity seen most frequently at the detention center each year. Additional breakdowns by general demographics are provided on the following pages. It should be noted that **Most Frequently Occurring Charges** do not represent distinct individual admissions - for example, a single individual admitted to the detention center on a single offense - but rather represent the overall number of charge activity observed, as an individual may be admitted to the jail with multiple charges.

Since 2021, **Unlawful Carrying of a Firearm** has been the most observed charge at the Detention Center, increasing in frequency each year.

**Arrests, Diversion, and Deflection - Tricounty Stabilization Center and Triage Services (TCSC)**

**DIVERSION & DEFLECTION**

Charleston County possesses an array of around the clock community-based options for diversion and deflection from jail. These are appropriate real-time alternatives for individuals living with mental illness, substance use disorders, and/or homelessness. TCSC accepts referrals from local hospitals, mental health providers, Mobile Crisis teams, and local law enforcement, to include the Charleston Dorchester Mental Health Center’s (CDMHC), EMS Telehealth, 911 Consolidated Dispatch Center, and the Tricounty Crisis Stabilization Center (TCSC).

The TCSC is a community-wide effort collaboratively funded by the South Carolina Department of Mental Health, Charleston Dorchester Mental Health Center (CDMHC), Medical University of South Carolina, Roper Saint Francis, Charleston Center, Charleston County Sheriff’s Office, and Berkeley Mental Health Center. The TCSC contains 10 beds operated by the CDMHC and is located in the Teddie E. Pryor Sr, Social Services Building along with Charleston Center (to include an onsite detoxification unit). In addition, TCSC contracts two beds at One80 Place for the unhoused.

**Familiar Faces** are individuals who frequently cycle through the jail, being booked and released three or more times within a two-year period. In 2023, **847 persons** were identified as a Familiar Face, with **1,958 Bookings** on **3,706 Charges**, utilizing **51,261 Bed Days**. The average length of stay was **26 days**, where represented **16.7%** (**140/839**) of the jail's annualized local population (Pretrial and Sentenced). On average a Familiar Face was 38 years old, and were most often identified as Male and Black.

**Most Visible Persons (MVP's)** are individuals who are booked and released from the detention center four or more times within a 12-month period. In 2023, **110 individuals** were identified as a MVP. The average age for an MVP was 42 years old, and were most often identified as Male and Black. MVP's utilized a total of **7,727 Bed Days**, with the average length of stay being **13 days**. MVP's represented **2.5%** (21/839) of the jail's annualized local population (Pretrial and Sentenced).

Note. The 2022 CJCC Annual Report defined MVP's as individuals booked seven or more times in a twelve-month period.

# BOND AND REENTRY

## Definitions

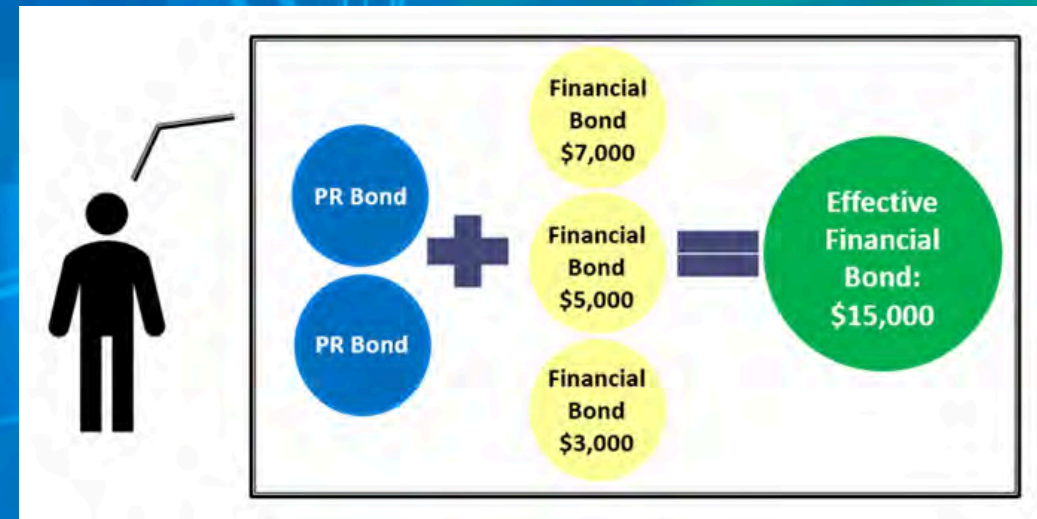

**Bail:** To procure the release of a person from legal custody, by undertaking that he shall appear at the time and place designated and submit himself to the jurisdiction of the court. - Black's Law Dictionary (2019)

**Effective Bond -** The combination of all bonds set on an individual per bond hearing. The type and amount of bonds are determined based upon the totality of bonds. An Effective PR bond signifies that only PR bonds were received, whereas an Effective Financial bond could indicate a combination of charges with both financial bonds and PR bond (see image).

**Personal Recognizance (P.R.) Bond:** Defendant will be released from jail on defendant's promise to appear at court and will not have to pay any money.

**Financial Bond:** Defendant will be released from jail if the defendant is able to satisfy the total amount of financial bonds, whether they are structured as a cash or surety bond.

## Effective Bond Matrix Example

## Bond and Reentry - Effective Bond Distribution

### Centralized Bond Court

Charges arising within the jurisdiction of General Sessions, City of Charleston, County of Charleston, and smaller municipalities within Charleston County will have their bonds set at Centralized Bond Court. The City of North Charleston sets its own municipal level bonds.

In 2023, the number of P.R. Effective Bond distribution **increased by 3%** compared to 2022, and the number of Financial Effective Bonds **increased by 7.3%**.

P.R. Effective bonds comprised of **32%** of all bonds in **2023**, whereas Financial Effective bonds comprised of **68%**. In **2022**, the percentages of each type were **33% (P.R.)** and **67% (Financial)**.

**Total Effective Bonds in Centralized Bond Court by Bond Type**

Note. Overall figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition

## Bond and Reentry - Effective Bond Distribution by Court

**Total Effective Bonds by Bond Classification**

Consistent with prior years, Effective Bonds in Summary Court have been predominately driven by PR bonds (71.2%), whereas Effective Bonds in General Sessions have been financially driven (73.1%).

This distribution between courts gives additional insight into the types of charges each court has jurisdiction over, as General Sessions Court sees charges with greater penalties than Summary Court.

**Effective Bonds Distribution for Summary Court**

**Effective Bonds Distribution for General Summary**

Note. Overall figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition

## Bond and Reentry - Average Financial Effective Bond Amount

The overall average effective bond amount across all courts for 2023 was **\$34,806.89**. When further broken down by court type, the average Effective Financial Bond Amount for General Sessions Court in 2023 was **\$40,599.65** and **\$3,271.53** for Summary Court. Other court driven bookings, which include Federal charges, was **\$22,212.96**

**Average Effective Bond Amount by Court**

2023 Overall Average Effective Bond Amount  
**\$34,806.89**

**Average Financial Bond Amount by Gender**

**Average Financial Bond Amount by Age**

**Average Financial Bond Amount by Race**

Note. Overall figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition

## Bond and Reentry - Pretrial Service Reports and Risk Assessment

### Pretrial Service Reports

The **Pretrial Service Report (PSR)** is used in Centralized Bond Court to summarize core information about the defendant, incorporating factors in a pretrial risk assessment. The National Association of Pretrial Services Agency's *Standards of Pretrial Release* recommends the use of validated risk assessments to inform bail decisions, and Charleston County Centralized Bond Court utilizes the **Charleston County Pretrial Risk Assessment Instrument (CPRAI)**. The use of the CPRAI ensures Charleston County citizens are provided with an assessment tool that is uniquely calibrated to our community rather than outside sources.

The PSR provides an objective, reliable and valid assessment for risk of re-arrest and failure to appear during the pretrial period. It predicts whether a defendant falls into a group that is **less likely (Risk Level 1)** or **more likely (Risk Level 4)** to be re-arrested and/or miss court while in the community on pretrial release. The PSR does not predict future violence or intentional flight from justice, and is not intended to be the sole factor used in making bond decisions. Judges consider the factors required by law, information provided by the state and defense during the bond hearing, and the PSR prior to rendering a decision appropriate to each individual case.

Risk Levels by Bond Type

Examining Risk Levels by various categories provides a better understanding of what type of circumstances are in place when Bond decisions are made, as well as provide more information as to the individuals that are impacted.

The following graphics display Risk Level demographic information by count. Information presented is gathered directly from the Pretrial Services Report compiled by CJCC Pretrial Analysts prior to Bond hearings.

In 2023, the majority of **Risk Level 1** individuals received a **P.R. Bond (69.67%)**, whereas all other Risk Level categories saw a majority of Financial bonds.

Bond and Reentry - 2023 Risk Levels

2023 Risk Level 1 Bond Type

2023 Risk Level 2 Bond Type

2023 Risk Level 3 Bond Type

2023 Risk Level 4 Bond Type

### Bond and Reentry - 2023 Risk Levels

# Risk Levels by Gender

Consistent with Jail Population figures, Males represent the majority of each Risk Level category.

Individuals that were identified as Female had the highest proportion of representation under the Risk Level 1 category (33.2%).

2023 - Risk Level 1

2023 - Risk Level 2

2023 - Risk Level 3

2023 - Risk Level 4

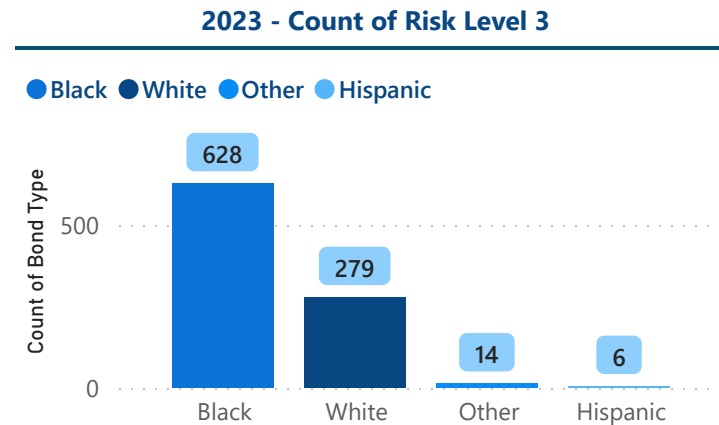

### Bond and Reentry - 2023 Risk Levels

# Risk Levels by Race

In 2023, Black adults were the most frequently observed Race for each Risk Level Category, with the exception of Risk Level 1. White Adults saw the highest number of representation under the Risk Level 2 category (2,736). Risk Levels 1 and 2 were more racially diverse, whereas Risk Levels 3 and 4 saw less groups overall represented.

Note. Race categories are based upon data entry methods and not self-reported.

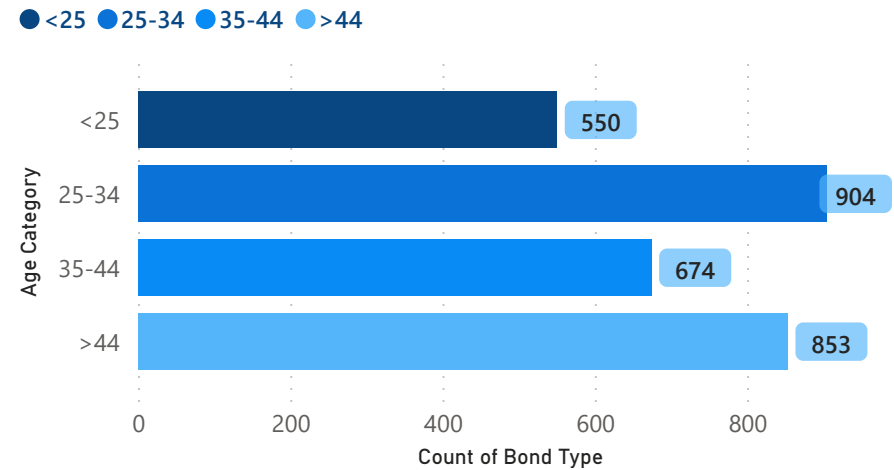

### Bond and Reentry - 2023 Risk Levels

## Risk Levels by Age

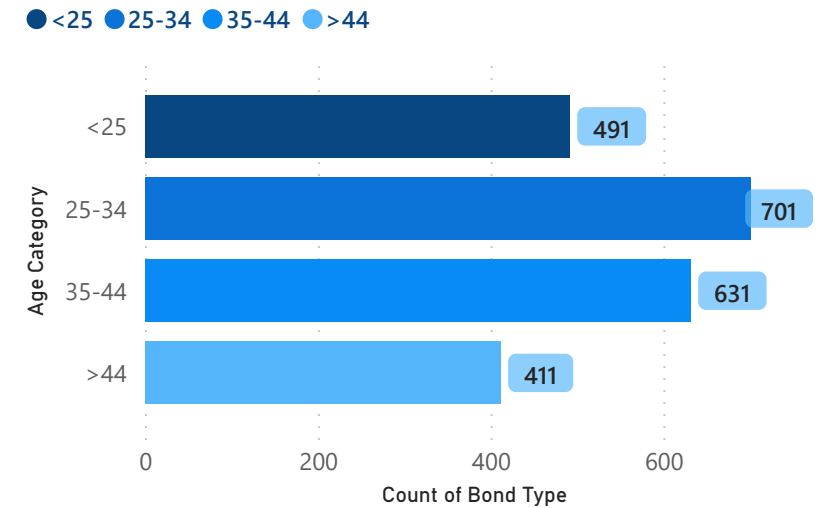

Adults who fell within the 25-34 Age Category at the time of booking were the most frequently observed group for each Risk Level.

To provide further clarification, the Age Group category of less than 25 (<25) does not include juvenile data, as this information is not included in CJCC's dataset.

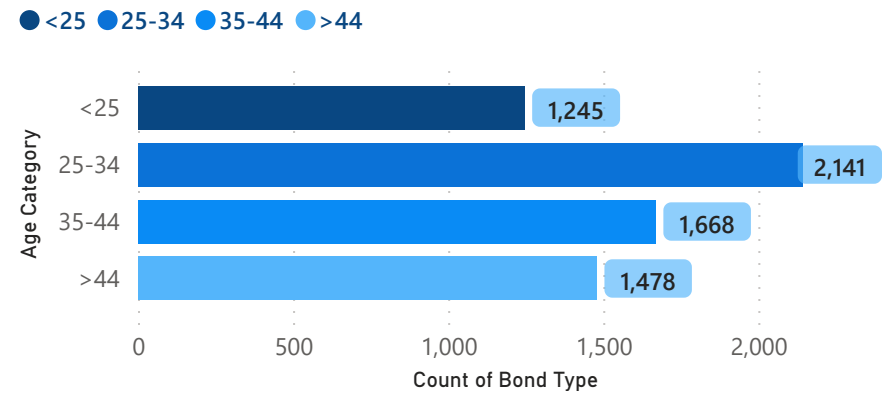

2023 - Count of Risk Level 1

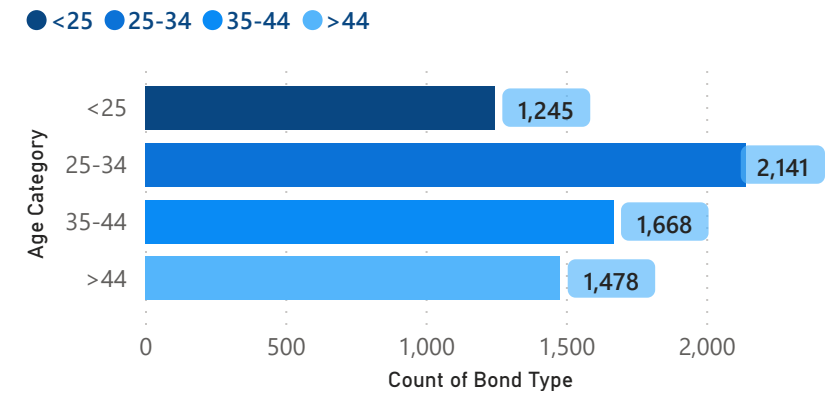

2023 - Count of Risk Level 2

2023 - Count of Risk Level 3

2023- Count of Risk Level 4

## Bond and Reentry - Pretrial Failure

Pretrial Failure occurs when an individual who has been granted bond and is released from the Detention Center violates their bond condition, either by being charged with a new offense or failing to appear before the Court per agreed upon conditions.

The CJCC has monitored the failure and success rates for individuals based on the type of Bond granted and Risk Level using various time parameters.

For the 2023 report, data was examined from January 8, 2020 until December 31, 2023 of cases where a Pretrial Services Report was generated. By identifying circumstances where pretrial failure occurs most often, insight is provided as to where opportunities to support individuals for pretrial success would best be focused.

Consistent with prior CJCC publications, **the majority of bond failures occurred within the first 6 months** following release.

Bond Failures by Month

Note. Date parameters extend from January 8, 2020 to December 31, 2023

### Bond and Reentry - Pretrial Failures by Demographics

Incorporating standard demographics into Bond Failures by Month identifies individuals who are 25-34 years old at the time of booking, Male, and Black to have the highest counts across each time frame category. This information is also consistent with Jail Booking Information presented under the Jail Use section.

**Bond Failures by Gender**

Sex ● Female ● Male ● Other

| White                     | 1,264        | 640          | 379          | 198          | 178        | <b>2,659</b> |
| <b>Total</b>              | <b>3,448</b> | <b>1,822</b> | <b>1,104</b> | <b>606</b>   | <b>614</b> | <b>7,594</b> |

Note. Date parameters extend from January 8, 2020 to December 31, 2023

## Bond and Reentry - Pretrial Success Rates

**Pretrial Success** occurs when an individual has completed the terms of a bond agreement by not incurring new arrest charges (Safety Failure) or by attending all mandated court appearances (Appearance Failure). Though the majority of individuals released are successful (77.9%), Risk Level 4's were more likely to see pretrial failure (61.8%) than success

**Safety Failure** - When a defendant returns to jail before the disposition (conclusion) of a case, for a reason other than a bench warrant (e.g. a new arrest)

**Appearance Failure** - Occurs when a defendant fails to appear for court, resulting in a bench warrant, failure to appear (FTA) or a Tried in Absentia (TIA) disposition.

**Total Failure** - is determined by the existence of one or more failure type (Safety and/or Appearance). Total Failure is used to calculate success and failure rate percentage.

| Risk Level   | Total Booking | Safety Failure | Appearance Failure | Total Failure | Any Fail %   | Success %    |
|--------------|---------------|----------------|--------------------|---------------|--------------|--------------|
| Risk Level 1 | 6,368         | 1,021          | 491                | 1,410         | 22.1%        | 77.9%        |
| Risk Level 2 | 10,489        | 3,461          | 1,246              | 4,283         | 40.8%        | 59.2%        |
| Risk Level 3 | 6,124         | 2,761          | 1,065              | 3,330         | 54.4%        | 45.6%        |
| Risk Level 4 | 3,292         | 1,678          | 725                | 2,034         | 61.8%        | 38.2%        |
| <b>Total</b> | <b>26,273</b> | <b>8,921</b>   | <b>3,527</b>       | <b>11,057</b> | <b>42.1%</b> | <b>57.9%</b> |

Note. Date parameters extend from January 8, 2020 to December 31, 2023 and include bookings where a PSR was generated.

## Bond and Reentry - Pretrial Success Rates by Demographics

In examining success rates closer through basic demographic information, it is important to note that none of the information provided indicates predictive capability. Rather, the data shared provides a broader understanding to further describe who has experienced past pretrial successes.

Gender and Age

Success Rate by Gender

Success Rate by Age

Risk Level Analysis

| Gender       | Total Booking | Safety Failure | Appearance Failure | Total Failure | Any Fail %   | Success %    |
|--------------|---------------|----------------|--------------------|---------------|--------------|--------------|

| 25-34        | 10,037        | 3,585          | 1,363              | 4,355         | 43.4%        | 56.6%        |
| 35-44        | 6,475         | 2,216          | 952                | 2,791         | 43.1%        | 56.9%        |
| <b>Total</b> | <b>26,273</b> | <b>8,921</b>   | <b>3,527</b>       | <b>11,057</b> | <b>42.1%</b> | <b>57.9%</b> |

Note. Date parameters extend from January 8, 2020 to December 31, 2023 and include bookings where a PSR was generated.

## Bond and Reentry - Pretrial Success Rates by Demographics

Success Rate by Race

In examining success rates closer through basic demographic information, it is important to note that none of the information provided indicates predictive capability. Rather, the data shared provides a broader understanding to further describe who has experienced past pretrial successes.

Success Rate by Race

| Race                        | Total Booking | Safety Failure | Appearance Failure | Total Failure | Any Fail %   | Success %    |
|-----------------------------|---------------|----------------|--------------------|---------------|--------------|--------------|
| + Native American           | 4             | 0              | 0                  | 0             | 0.0%         | 100.0%       |
| + Unknown                   | 9             | 1              | 1                  | 1             | 11.1%        | 88.9%        |
| + Asian                     | 44            | 6              | 0                  | 6             | 13.6%        | 86.4%        |
| + Hispanic                  | 346           | 44             | 38                 | 75            | 21.7%        | 78.3%        |
| + Indian/Mid-Eastern        | 44            | 13             | 0                  | 13            | 29.5%        | 70.5%        |
| + White                     | 9,190         | 2,684          | 1,144              | 3,396         | 37.0%        | 63.0%        |

| + Hawaiian/Pacific Islander | 5             | 0              | 3                  | 3             | 60.0%        | 40.0%        |
| <b>Total</b>                | <b>26,273</b> | <b>8,921</b>   | <b>3,527</b>       | <b>11,057</b> | <b>42.1%</b> | <b>57.9%</b> |

# CASE PROCESSING

CMS Cases Filed  
**7,985**

CMS Cases Disposed  
**8,496**

Clearance Rate  
**106.40%**

The CJCC has driven consistent improvements within case processing in Charleston County, including public defender representation in Centralized Bond Court and efficient evidence transfers which supports faster assignment of cases within the Solicitor's office.

Reducing the overall time it takes to bring cases to disposition in General Sessions Court has been a persistent struggle. While these challenges existed prior to the COVID-19 pandemic, they have been exacerbated with increased times to disposition and a growing backlog.

The following data sources are utilized in this section:

- Disposition Activity (CMS-GS and SACDC)
- Front End Indicators (CMS-GS, PbK, SACDC, Defender Data)
- Backlog Estimates (CMS-GS)

Figures in this section represent General Sessions Court unless otherwise noted.

## Case Processing - Disposition Activity

Cases Received and Disposed by Year

**Disposition** refers to the court's final ruling in a case, essentially bringing a criminal case to its conclusion. A **clearance rate** compares the amount of cases filed (incoming) to cases disposed (outgoing). **Time to Disposition** is a measurement in days between the charge date - usually the day of arrest- and when the case is settled by the court.

Between 2022 and 2023, the amount of total cases disposed **increased by 20%**, while the number of cases filed **increased by 9.5%**.

Median and Average of Time to Disposition in Days

**Median** and **Average** measurements are used in this report to provide a better understanding of how case anomalies may impact overall numbers. For example, a case experiencing significant time between charge and disposition may result in a skewed average, whereas the median (the middle number in a data set) provides insight into where the center value is located by removing extreme outliers. When Medians and Averages are close together, then the data set is considered balanced.

The median time to disposition decreased from 633 days in 2022, to **609 days in 2023**, and the average time to disposition decreased from 709 days in 2022 to **689 days in 2023**.

### Case Processing - Disposition Activity

Cases Disposed by Disposition Type

Disposition Types can include Conviction (Guilty) and Non-Conviction (Not-Guilty or another type of ruling). The most commonly seen Disposition Descriptions are Guilty Pleas, Nolle Prosequi (a decision made to not prosecute), and Dismissed Not Indicted (dismissed with no formal charges filed).

In 2023, Guilty pleas were the most common disposition observed, increasing from 2022 by 29%

Case Disposition by Description

| Disposition Description                 | 2014         | 2015         | 2016         | 2017         | 2018         | 2019         | 2020         | 2021         | 2022         | 2023         |
|-----------------------------------------|--------------|--------------|--------------|--------------|--------------|--------------|--------------|--------------|--------------|--------------|
| Pled Guilty                             | 3,930        | 4,230        | 3,809        | 4,185        | 3,263        | 3,590        | 2,467        | 2,353        | 2,995        | 3,867        |

| Dismissed - Affidavit Signed            |              |              |              |              |              |              | 1            |              | 1            | 1            |
| Dismissed - Restitution Made Ended      |              |              |              |              |              |              | 1            |              |              |              |
| Nolle Prosequi Indicted                 |              |              |              |              | 1            |              |              |              |              |              |
| <b>Total</b>                            | <b>7,243</b> | <b>7,686</b> | <b>6,433</b> | <b>7,776</b> | <b>6,546</b> | <b>6,846</b> | <b>4,899</b> | <b>6,195</b> | <b>7,064</b> | <b>8,496</b> |

Note. Overall Figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition.

### Case Processing - Front End Indicators

Front End Indicators are data points established at the front-end of the criminal court process to track and help expedite case movement. Both Time to Solicitor Assignment and Time to Discovery have ultimately decreased since CJCC monitoring began in 2018. Decreases in front-end indicators support improvements to case processing efficiency, to include case management strategies and the incorporation of technology.

Median and Average Time to Discovery Received

Median and Average Time to Solicitor Assignment

**Time to Discovery** - The amount of time (in days) for law enforcement to submit case related documents, such as police reports, evidence, and other types of documentation, to the Solicitor's office for review.

**Time to Solicitor Assignment** - The amount of time (in days) for a Solicitor (Prosecutor) to be assigned to a case.

Note. Overall Figures reported may marginally fluctuate between reporting years due to data storage methods and case

## Case Processing - Total Open Cases

Examining current Open Cases by length of time allows for a better understanding of how pending cases impact the case processing backlog. While insight into the age of open cases is helpful, understanding is still limited as to the challenges present in moving a case forward or to disposition.

Similar to differences seen in bookings, charges, and person numbers reported in *Jail Use*, individuals may have multiple cases pending, which could consolidate when disposition occurs.

Pending cases are examined from 2014 - 2023 based upon the availability of descriptive information for this time frame.

**Open Cases at Case and Person Level**

**Open Cases by Case Age Category**

Note. Overall Figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition.

Demographic information regarding open cases remains consistent with observations made in prior sections of this report. Individuals identified as Male, Black, and between the age of 25-34 at the time of booking, represent the majority of open cases.

## Case Processing - Total Open Cases

### Open Cases by Defendant Age Category

Age Category ● <25 ● 25-34 ● 35-44 ● >44

### Open Cases by Defendant Race

Race ● Black ● Other ● White

### Open Cases by Defendant Gender

Gender ● Female ● Male ● Other

Note. Overall Figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition. Race categories are based on CMS classification and are not self-reported.

## Case Processing - Open Cases by Custody Status

Total Open Cases by Custody Status

**Custody Status** refers to how an individual is awaiting a final decision by the court, whether jailed (**In-Custody**) or not (**Out of Custody**). An **Out of Custody** status could indicate incarceration occurred at the initial booking process, for example, a defendant booked into the detention center and subsequently released on bond, or a non-custodial arrest where a defendant is not admitted to jail. The majority of open cases involve defendants who have an **Out of Custody** status.

Total Open Cases by Gender (In Custody)

Total Open Cases by Gender (Out of Custody)

Note. Overall Figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition. Race categories are based on CMS classification and are not self-reported.

## Case Processing - Open Cases by Custody Status

**Custody Status** is reported based upon a case's status as of December 31, 2023. Demographics presented on this page are further divided from the Overall Open Cases figures previously presented, and thus reflect similar breakdowns of Age, Race, and Gender.

Total Open Cases by Race (In Custody)

Total Open Cases by Race (Out of Custody)

Open Cases by Age (In Custody)

Open Cases by Age (Out of Custody)

Note. Overall Figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition. Race categories are based on CMS classification and are not self-reported.

## 2023 Disposition Activity

**2023 Median Time to Disposition by Race**

**2023 Median Time to Disposition by Age Group**

**2023 Median Time to Disposition by Gender**

**2023 Median Time to Disposition**

**2023 Average Time to Disposition**

**2023 Average Time to Disposition by Race**

**2023 Average Time to Disposition by Age Category**

**2023 Average Time to Disposition by Gender**

**Time to Disposition** is a measurement (in days) between the charge date and when the case is settled by the court.

For this section, **Median** and **Average Time to Disposition** numbers are generated from combining detention center data (SACDC) and Court Management System data (CMS). Due to the joining of multiple record systems, marginal differences are seen in overall median and average values.

In Custody and Out of Custody disposition categories reflect similar distributions of demographics of Gender, Race, and Age.

Note. Time to Disposition date is acquired through a combination of SACDC and CMS data. Race categories are based on CMS classification and are not self-reported.

# COMMUNITY ENGAGEMENT

Community engagement remains a key element of the CJCC’s efforts. The CJCC’s approach to community engagement is two-tiered: to inform and involve the community while advancing the CJCC’s mission. Since its inception, community representatives have been at the table informing CJCC efforts.

The CJCC Founding Bylaws recognized early on the importance for community involvement by including Community Representatives on the Council. There are twelve community representatives appointed to the CJCC, whose roles include selecting one member to serve as a Co-Vice Chair on the Executive Committee and vote on their behalf. Community representatives reflect the diverse needs and concerns of Charleston County residents. Representatives attend and participate in CJCC monthly meetings, review CJCC documents, gather and share community views, and provide voice and feedback from the community in the CJCC decision-making process.

## 2023 Events Summary

On April 18, 2023, the CJCC partnered with the Charleston Metro Chamber of Commerce and the Charleston Forum to host **Understanding Our Community: What the Data Says**. The event aimed to enhance the community's understanding of local challenges by sharing current information, highlighting their interconnectedness, and promoting data-driven decision-making. Participants from a wide array of communities and agencies shared insights, experiences, and ideas.

On October 20, 2023, the CJCC and Charleston Forum hosted a one-day conference titled **The State of South Carolina’s Criminal Justice System**. The event highlighted best practices to improve public safety, justice, and fairness in South Carolina. Leaders working with South Carolina's criminal justice system were invited to participate, and topics featured diverse, research-based presentations on statewide issues. Subject matter experts addressed South Carolina’s key challenges and progress in specific areas, highlighting trends and best practices. The event aimed to inform and inspire other communities, while initiating a collaborative network of data-guided leaders, locally and statewide, committed to enhancing South Carolina’s criminal justice system.

Dr. Tonya M. Matthews, Ph.D., President & CEO, International African American Museum, shares guidelines for learning from those with lived experience.

Dr. Nancy La Vigne, Director, National Institute of Justice served as the conference keynote speaker.

# COMMUNITY ENGAGEMENT

The events were promoted across platforms in Spanish and English.

## Community Justice Forums

In addition to hosting broad community-focused events, the CJCC organized several topic-specific forums aimed to provide practical and relevant information to community members.

Forum topics were identified by community members during prior engagement sessions as being specific areas of interest. Two Community Justice Forums offered in 2023 included: **What are Your Rights if You are Victim of a Crime? / ¿Cuáles son sus derechos si es víctima de un delito?** and **Housing Information and Resources / Información y recursos de vivienda.**

These events shared resources, how to seek help, where to start accessing support systems, and ways to advocate for themselves and others. Participants asked questions, gave feedback, and shared viewpoints.

The CJCC aims to increase community members' access to information and resources by enhancing language accessibility. Both events and all materials, before and after, were distributed in Spanish and English. A native speaker provided Spanish interpretation during the events.

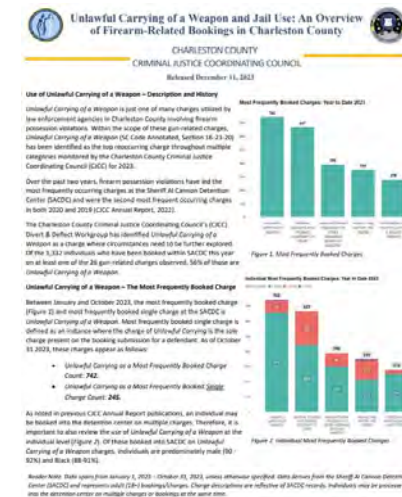

## Ongoing Engagement

The CJCC's commitment to understanding community needs holistically through data and open dialogue with the community goes beyond mere collection and analysis. CJCC stakeholders and community members review information in workgroups, exchange ideas, and pose questions based on their findings, guiding further research.

All reports published by the CJCC, to include previous annual reports, are available on the website. Reports published in 2023 included:

**Charleston County Trends in Case Processing, Fairness, and Reentry from Jail (February, 2023)**

## Unlawful Carrying of a Weapon and Jail Use: An Overview of Firearm-Related Bookings in Charleston County (December, 2023)

Unlawful Carrying of a Weapon Report (2023)

## Summary

Community members and system leaders have the best opportunities for overcoming longstanding, complex, criminal justice challenges by working together. The CJCC is committed to remaining a conduit for information sharing and understanding throughout Charleston County as data and lived experiences intertwine.

## WHAT TO EXPECT IN 2024

As the Charleston County Criminal Justice Coordinating Council continues progress in the upcoming year, we look forward to multiple opportunities and partnerships within the local community to support systematic change.

Data application is the most impactful when it is appropriately situated within both organizational and societal context. Evidence-based approaches to public safety will guide the identification of gaps, areas for improvement, and noted strengths in our community to support efforts of procedural justice through transparency and accountability.

As we better equip and empower our stakeholders through relevant data application, we look towards these same individuals for guidance and input in our next five-year (FY 2024-2029) Strategic Plan development phase, which is currently in progress. Even more, we welcome the expansion of new relationships as we increase our areas of research, seek to diversify our membership, and expand our focus within the field of public safety for the citizens of Charleston County.
