EXECUTIVE SUMMARY

The CJCC's mission is to assist in making sustainable, data-driven improvements to Charleston County's criminal justice system and thereby improve public safety and community well-being. We do this in a number of ways, such as monthly Workgroups, Ad Hoc Committees, collaborations with government and county agencies, the community, private sector stakeholders, research collaborations, and by providing data that analyzes the local criminal justice system. We are pleased to present the 2024 Annual Report.

As previous Annual Reports have done, this year you will again find detailed reviews of local system functions, which include Jail Use, trends in Arrests, Diversion, and Deflection efforts, Bond and Reentry practices and Case Processing.

We note that Jail Use, which is measured by the average daily population (ADP) and is the sum of the Pretrial and Sentenced population, is steadily increasing. In 2024, the ADP was 1,114 individuals, up from 2023 which was 973 individuals. This remains a decrease from 1,189 individuals in 2014 when CJCC began collecting ADP data.

In 2024, the most frequently booked charge was Driving Under the Influence (DUI) 1st with 1,155 warrants. The second most frequently booked charge was Shoplifting with 636 warrants, followed by Trespass with 630 warrants. In 2023, Unlawful Carrying of a Firearm was the most frequently booked charge for the third year in a row with 841 warrants

and does not even appear in the 10 most frequently booked charges in 2024. This shift can be attributed to the South Carolina's "Constitutional Carry" Bill, H.3594 that was signed into law on March 7, 2024. What this means going forward is too early to know; however, the CJCC is tracking and analyzing data to better understand the effects, if any, this change has on public safety in Charleston County.

Charleston County is seeing an increase in Tri-County Crisis Stabilization Center and Triage Services (TCSC). TCSC offers 24/7 options for diversion and deflection from jail. These are services that provide alternatives for individuals living with mental illness, substance use disorders, and/or homelessness. In 2024 we had 518 referrals, and 307 admissions, which was a 35% and 57% increase respectively.

A continuing challenge is Case Processing. This is measured by the time between the arrest date and when the case is settled by the court. Between 2023 and 2024, the number of total cases disposed decreased by 15%, while the number of cases filed increased by 6%. As of December 31st, 2024, there were 14,780 pending (open) cases. Of those, 8,078 have been pending over a year. The CJCC's case processing workgroup reviews data and seeks to implement strategies that support more efficient case processing.

A cornerstone of the CJCC since inception has been community engagement, and this past year was no exception. We have twelve community representatives on our council, one who serves as a Vice-

Chair of the CJCC. We hosted an online Community Justice Forum and are continuing to build a South Carolina CJCC Network composed of five other counties, the South Carolina Department of Corrections, and the Department of Juvenile Justice. We launched a Juvenile Justice Coordinating Council that is growing and collaborating with other agencies. Our Community Engagement Leadership Team is in the process of preparing to initiate community conversations in 2025. We encourage you to stay engaged with us as we continue to work together to make our criminal justice system more effective, equitable, and efficient.

We are grateful to Chief Mark Arnold, CJCC Chair, Brandon Lilienthal, CJCC Vice-Chair and Ashley Pennington, CJCC Vice-Chair, for their leadership. And most especially, we are appreciative of the entire Charleston community for their persistent determination to make our local criminal justice system the best it can be.

Ellen S. Steinberg, J.D.

Director
Charleston County
Criminal Justice Coordinating Council

READING THE REPORT

The **Charleston County Criminal Justice Coordinating Council (CJCC) Annual Report** provides an account of progress made to improve the local justice system through **data transparency**. Including initiatives identified through support of committee members and stakeholders, the data contained in this report is resourced through the CJCC centralized data warehouse and related databases unless noted otherwise.

As emphasized in prior annual reports, data constructs are fluid, as information pertaining to cases evolve and/or expungement occurs. Such dynamic changes - to include changes to disposition codebooks, arrest/charge descriptions, and differences in booking procedures - will be reflected in minor differences when comparing static year-to-year reporting.

In utilizing information present in this report, readers should be sensitive to factor definitions, data parameters, limitations of data, and the appropriate application and interpretation of figures. The CJCC Annual Report also highlights **Community Engagement** efforts, which stem from a direct application of data obtained through its valuable partners.

DATA CONTRIBUTORS (17 Total)

Law Enforcement: Charleston County Sheriff's Office (CCSO), Charleston Police Department (CPD), North Charleston Police Department (NCPD), Mount Pleasant Police Department (MPPD), and College of Charleston Public Safety.

Summary Courts: Charleston County Magistrates (CMS-Mag), Charleston Municipal Court, North Charleston Municipal Court, and Mount Pleasant Municipal Court.

General Sessions: Charleston County Clerk of Court (CMS-GS), Ninth Circuit Solicitor, Charleston County (Prosecution by Karpel, PbK), Ninth Circuit Public Defender, Charleston County (Defender Data, DD).

Jail: Charleston County Sheriff's Office, Sheriff Al Cannon Detention Center (SACDC).

Pretrial: Pretrial Services Database (PSD)

Community Based Services: Charleston Dorchester Mental Health Department (CDMHC)

Jail Use

Jail Use

Average Daily Population

Understanding how the jail is used in Charleston County provides a critical center point for the local justice system. Jail Use data is sourced from the Sheriff Al Cannon Detention Center (SACDC) and includes the following:

- Average Daily Population
- Admissions and Releases
- Average Length of Stay
- Charges by Court Type

The average daily population (ADP) is a measurement of the jail population. The ADP is derived from monthly snapshots taken from the first of the month and averaged. Local ADP is the sum of the Pretrial and Sentenced population, and excludes uses of the jail by non-local jurisdictions such as the federal government or other counties (i.e. HOLD).

Over the past ten years, overall reductions in local jail use have been observed. However, steady increases have been recorded in recent years.

In 2024, the average total jail population was **1,114 individuals**.

Average Daily Population by Population Type

Note. Overall figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition.

Average Daily Population

Demographics surrounding Average Daily Population numbers are gathered from booking information when provided.

In 2024, the Average Daily Population was reported to be predominately **Male (1,022)** and within the **35-44 Age Group** (335 or 30% of all ages).

Overtime, minor fluctuations have been noted regarding Race representation. In 2024, **the Average Daily Population** consisted of 752 Black Adults, 332 White Adults, 26 Hispanic Adults, 2 Indian/Middle Eastern Adults, 1 Asian Adult, 2 Adults where Race was noted as Other, and 1 each of Native American, Pacific Islander, and Unknown.

It should be noted that Race is based upon data entry methods and does not derive from individual self-reporting.

Race	Average Population
Asian	1
Black	752
Hawaiian/Pacific Islander	1
Hispanic	26
Indian/Mid-Eastern	2
Native American	1
Other	2
Unknown	1
White	332
Total	1,114

Note. Overall figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition.

Jail Use

2024 Annual Report

Local Admissions

The term "**local**" for jail population data is used to exclude circumstances when the Detention Center may be used for non-local jurisdictions, such as the federal government or non-Charleston County agencies. A **booking** refers to the process in which information is entered to create an official arrest record. An individual may be admitted into the jail on multiple charges or bookings, and each of these categories are reflected within the Annual Report. In 2024, the total number of bookings (10,173) saw a **19.4% increase** from 2023. These bookings consisted predominately of Males (78%), were identified as Black (54%) or White (42%), and between the Ages of 25-34 (30%).

Local Bookings by Year

Local Bookings by Gender

Local Bookings by Race

Local Bookings by Age

Note. Overall figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition.

Jail Use

2024 Annual Report

Local Charges

The term "local" for jail population data is used to exclude circumstances when the Detention Center may be used for non-local jurisdictions, such as the federal government or non-Charleston County agencies. An individual may be admitted into the jail on multiple charges

A charge refers to the formal accusation of criminal activity that an individual is alleged to have committed. A charge must be proven in court, and is not indicative of guilt. An individual may be booked on multiple charges. Charges for 2024 are presented in counts.

In 2024, there were **18,723 local charges**.

Local Charges by Gender

Local Charges by Race

Race	Total Charges
Asian	39
Black	10,892
Hawaiian/Pacific Islander	15
Hispanic	621
Indian/Mid-Eastern	15
Native American	2
Other	10
Unknown	10
White	7,119
Total	18,723

Local Charges by Age

Note. Overall figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition.

Local Count by Person

An individual may be admitted into jail on multiple charges or bookings. Thus, reviewing jail activity through unique individuals that are admitted is extremely helpful in determining the use of the Detention Center in Charleston County.

In 2024, 8,370 individuals were admitted into jail - this is an overall **decrease of 58%** since 2014. These figures reflect **local use**, which excludes circumstances when the Detention Center may be used for non-local jurisdictions, such as the federal government or non-Charleston County agencies.

Person Count by Race	
Race	Total Persons
Asian	24
Black	4,318
Hawaiian/Pacific Islander	8
Hispanic	353
Indian/Mid-Eastern	9
Native American	1
Other	7
Unknown	6
White	3,649
Total	8,370

Note. Overall figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition.

Jail Use

2024 Annual Report

Average Length of Stay

Average Length of Stay (ALOS) is reported in **Days**. ALOS calculations are based on the number of unique adult bookings released each year. Averages can be impacted by outliers, for example individuals released who experienced a substantial length of stay. Population Groups are identified as those awaiting trial (Pretrial) and those serving a sentence as result of a conviction (Sentenced). **In 2024, ALOS decreased by 20%** from 2023.

In 2024, the ALOS for the total jail population was 28 days. Males were held for longer periods of time (33 days) than other groups. Age categories experienced similar length of stays, with those 25 - 44 years averaging 28 days. Individuals released in 2024 identified as Native American (368) and Indian/Middle Eastern (87) experienced the highest average length of stay.

Average LOS by Population Group

Release Year	Pre-Trial	Sentenced
2024	27	48
2023	35	34
2022	36	46
2021	26	97
2020	31	89
2019	28	72
2018	22	66
2017	22	29
2016	20	28
2015	19	27
2014	14	23

Average LOS by Gender

Average LOS by Race

Race	Average LOS	Number of Releases
Asian	1.9	23
Black	34.3	4219
Hawaiian/Pacific Islander	13.2	8
Hispanic	18.9	346
Indian/Mid-Eastern	86.9	9
Native American	368.5	2
Other	0.4	7
Unknown	29.7	7
White	20.9	3604
Total	28.0	8220

Average LOS by Age

Note. Overall figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition.

Jail Use

2024 Annual Report

Charges by Court

Criminal offenses which are subject to a penalty of a fine less than \$500.00 or imprisonment not exceeding 30 days (or both) fall under the jurisdiction of **Summary Court**. CJCC data includes information from the following courts: Charleston Municipal, Folly Beach Municipal, Isle of Palms Municipal, Magistrate, Mount Pleasant Municipal, North Charleston Municipal, and Sullivan's Island Municipal.

In comparison, **General Sessions Court** has jurisdiction over misdemeanor or felony offenses that carry a sentence greater than 30 days and fines greater than \$500.

Summary Court and **General Sessions Court** charges comprise the majority of charges observed within the Charleston County Detention Center. In 2024, increases were seen in charges for both **General Sessions Court (1.2%)** and **Summary Court (43%)** from 2023.

Total Bookings by Person Count

Charges by Court

Year	Summary Court	General Sessions Court	Family Court	Probation & Parole	Drug Court	Mental Health Court
2024	7,717	9,742	480	264	16	3
2023	5,390	9,622	429	171	23	15
2022	4,242	8,935	383	259	20	16
2021	3,467	8,701	234	293	20	8
2020	3,678	8,502	302	352	14	14
2019	5,738	9,406	674	440	32	22
2018	7,983	10,206	622	396	46	25
2017	13,204	12,090	706	348	50	45
2016	14,478	10,376	899	224	42	32
2015	18,405	10,184	1,425	224	72	31
2014	25,626	11,728	1,347	342	64	45

Note. Overall figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition.

Jail Use

2024 Annual Report

Average Length of Stay by Court

Average Length of Stay (ALOS) is based on the length of time individuals spent at the detention center for each calendar year. CJCC reports have historically identified the average length of stay for Federal charges and Holds to be consistently higher compared to other Courts at the Detention Center. In 2023, the average length of stay for Federal Court for those released in 2023 was 260 days. In 2024, this decreased to **244 days**.

Summary Court average length of stay is based on the average of all local courts which meet the criteria of charges with impending fines less than \$500 and/or imprisonment not exceeding 30 days. In 2024, the Summary Court average length of stay was **11 days**. General Sessions Court has jurisdiction over misdemeanor or felony offenses that carry a sentence greater than 30 days and fines greater than \$500. In 2024, the General Sessions Court average length of stay was **53 days**. Both General Sessions and Summary Court length of stay decreased since 2023.

Note. Overall Figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition.

Jail Use

2024 Annual Report

Average Length of Stay by Court - Person Count

Average Length of Stay (ALOS) is based on the length of time individuals spent at the detention center for each calendar year and is reported in Days. In comparison to the previous page, Average Length of Stay by Court and number of individuals released from the Detention Center with cases being heard in the different Courts vary for 2024. For example, while General Sessions Court and Charleston Municipal Court saw the highest number of individuals released from the detention center in 2024, the highest average length of stay were individuals who cases were being heard in Federal Court (212 Days) or Mental Health Court (182 Days).

Number of Distinct Persons by Court

Release Year	General Sessions Court	Other	Summary Court
2024	4207	1054	4774
2023	4309	939	3335
2022	3961	875	2693
2021	3782	818	2273
2020	3977	971	2492
2019	4098	1407	3643
2018	4695	1285	5310
2017	5306	1018	8966
2016	5006	1072	9715
2015	5011	1539	12009
2014	5526	1431	15609

Note. Overall Figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition.

"Other" category includes non-local courts, such as Federal Court or non-local jurisdiction holds.

Arrests, Diversion, & Deflection

Arrests, Diversion, & Deflection

South Carolina Incident Based Reporting System (SCIBRS) crime data are based on incident reports submitted by state and local law enforcement agencies to the State Law Enforcement Division (SLED). Offenses are classified according to the SCIBRS definitions rather than according to local ordinances, state statutes or federal statutes. SCIBRS collects in-depth data for Group A offenses, which are divided into three categories.

Crimes Against Persons (e.g., murder, rape, and assault) are those whose victims are always individuals.

Crimes Against Property (e.g., robbery, burglary, shoplifting) include crimes to obtain money, property or some other benefit.

Crimes Against Society (e.g., gambling, prostitution, drug violations, and weapons violations) represent society's prohibition against engaging in certain types of activity.

CRIME CATEGORIES

Crimes Against Persons	Crimes Against Property	Crimes Against Society
Murder and Non-negligent Manslaughter	Arson	Drug/ Narcotic Violations
Negligent Manslaughter	Burglary/ Breaking and Entering	Drug Equipment Violations
Kidnapping, Abduction	Destruction/ Damage/ Vandalism	Betting/ Wagering
Forcible Rape	Counterfeiting/ Forgery	Operating/ Promoting/ Assisting Gambling
Forcible Sodomy	False Pretenses/ Swindle/ Confidence Game	Gambling Equipment Violations
Sexual Assault with an Object	Robbery	Pornography/ Obscene Material
Forcible Fondling	Shoplifting	Prostitution
Incest	Theft from Building	Purchasing Prostitution
Statutory Rape	Theft from Motor Vehicle	Assisting/ Promoting Prostitution
Aggravated Assault	Theft of Motor Vehicle Parts/ Accessories	Weapon Law Violations
Simple Assault	All Other Larceny	Animal Cruelty
Intimidation	Motor Vehicle Theft	
Human Trafficking/ Commercial Sexual Acts	And 12 Others	

Note. Crime categories are defined as by the South Carolina Incident-Based Reporting System (SCIBRS) and the FBI National Incident-Based Reporting System (NIBRS).

Arrests, Diversion, & Deflection

Charleston County Number of Crimes Reported

The follow section examines data surrounding arrest, diversion, and deflection trends in Charleston County. These data points derive from the front-end of the justice system process, and include key benchmarks from initial law enforcement interactions and detention alternative strategies.

Arrest: The act of taking or detaining someone in custody by legal authority.

Diversion: An alternative sentencing option that allows an individual charged with certain crimes to avoid a criminal conviction.

Deflection: A strategy to direct individuals away from the criminal justice system, usually an alternative path for support or treatment.

Sources from this section include: SCIBRS, Charleston County Sheriff’s Office, Charleston Police Department, North Charleston Police Department, Mount Pleasant Police Department, College of Charleston Public Safety, Tri-County Crisis Stabilization Center (TCSC), and the Pretrial Services Database.

Note. Number of Crimes Reported is derived from the South Carolina Incident-Based Reporting System (SCIBRS) and are released in a one-year delay. Annual numbers will marginally fluctuate based on case processing and reporting procedures. Figures retrieved on 2/26/2024.

Arrests, Diversion, & Deflection -Crime Rates

2024 Annual Report

Charleston County and South Carolina Crime Rates with Local SACDC Booking Rates

Jurisdiction

- Charleston County Crimes Against Person
- Charleston County Crimes Against Property
- Charleston County Crimes Against Society
- Charleston County Local Bookings - SACDC
- SC Crimes Against Person
- SC Crimes Against Property
- SC Crimes Against Society

Overall, crime rates reported have followed similar trends between South Carolina and Charleston County. Since 2014, the overall local population booking rates have continued to decrease, while reported Crimes Against Person, Property, and Society have remained relatively consistent through 2023. Figures reported by SCIBRS traditional experience a one-year delay. The displayed graph displays Charleston County numbers as solid lines, South Carolina state numbers as dotted lines, and detention center booking rates as a bold red line.

2023 Crime Types

Crime Rate Per 1,000

Charleston County Crimes Against Person	22
Charleston County Crimes Against Property	47
Charleston County Crimes Against Society	16
Charleston County Local Bookings - SACDC	20
SC Crimes Against Person	21
SC Crimes Against Property	47
SC Crimes Against Society	16

Arrests, Diversion, & Deflection - Crime Rates

For **Charleston County**, Larceny-Theft crimes were the most reported in 2023 (6,819) followed by Simple Assault (6,279). Violent offenses, such as Robbery (377) and Murder/Nonnegligent Manslaughter (64) were reported less frequently.

2023 Charleston County Crime Numbers

Count	Offense Type
6,819	Larceny-Theft
6,279	Simple Assault
2,364	Motor Vehicle Theft
2,133	Aggravated Assault
1,234	Burglary/Breaking & Entering
377	Robbery
64	Murder and Nonnegligent Manslaughter

Note. Numbers derive from the SCIBRS database and retrieved 2/26/2024.

Arrests, Diversion, & Deflection

2024 Annual Report

Custodial and Non-Custodial Arrests

Arrests may fall into one of two categories: **Custodial** and **Non-Custodial**. A **Custodial Arrest** refers to a physical detention or confinement of an individual for a criminal offense in a jail or holding facility. A **Non-Custodial Arrest occurs** when there is a temporary detention of an individual, thus depriving a person of his/her liberty by legal authority, for the purpose of issuance of a citation or summons regarding a criminal activity.

Data indicates the four largest law enforcement agencies in Charleston County (Charleston Police Department, North Charleston Police Department, Mount Pleasant Police Department, and Charleston County Sheriff's Office), continue to represent most of the jail use among local law enforcement agencies. Though additional local agencies utilize the detention center (to exclude Holds or non-local agency use), these four agencies represented approximately **90%** of detention center activity in **2024**.

Note. Overall figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition. MPPD data reflects 2021 forward.

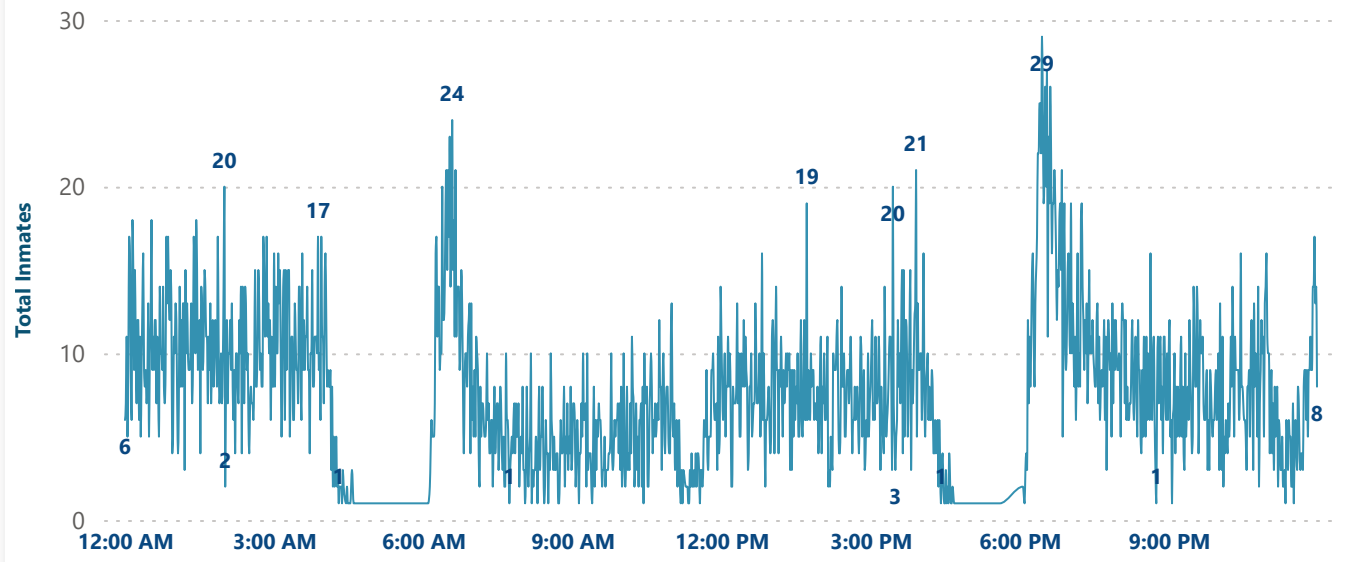

Arrests, Diversion, & Deflection

2024 Annual Report

Custodial Arrest Activity

A **Custodial Arrest** refers to a physical detention or confinement of an individual for a criminal offense in a jail or holding facility. In 2024, there were **9,793 Custodial Arrests**, with Custodial Arrests being reported more often than **Non-Custodial Arrests**. Figures are reported in counts of arrests and total percentage of arrests by the provided categories of Age, Gender, and Race.

Custodial Arrests by Timeline

Custodial Arrests by Week Day

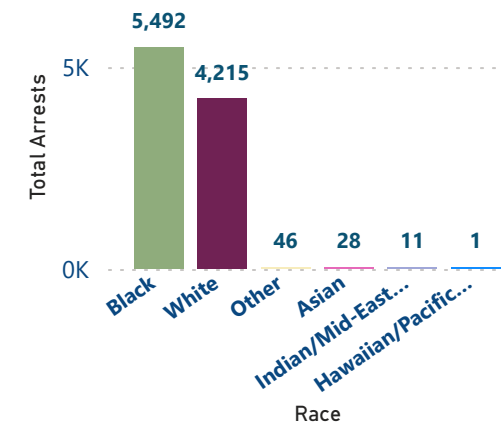

WeekDay	Total Arrests	% of Arrests
Sunday	1,667	17.0%
Monday	1,550	15.8%
Tuesday	1,484	15.2%
Wednesday	1,259	12.9%
Thursday	1,304	13.3%
Friday	1,324	13.5%
Saturday	1,205	12.3%
Total	9,793	100.0%

● <25 ● 25-34 ● 35-44 ● >44

Note. Overall figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition.

Arrests, Diversion, & Deflection

Most Frequently Occurring Charges

The **Most Frequently Occurring Charges** provide a further glimpse into the type of activity seen most frequently at the detention center each year. Additional breakdowns by general demographics are provided on the following pages. It should be noted that **Most Frequently Occurring Charges** do not represent distinct individual admissions - for example, a single individual admitted to the detention center on a single offense - but rather represent the overall number of charge activity observed, as an individual may be admitted to the jail with multiple charges.

Since 2021, **Unlawful Carrying of a Firearm** has been the most observed charge at the Detention Center, increasing in frequency each year. In 2024, a new top charge of **Driving Under the Influence (DUI) 1st** was recorded.

2024

#	Year	Charge Category	Total Warrants
1	2024	DRIVING UNDER INFLUENCE (DUI) 1ST	1,155
2	2024	SHOPLIFTING	636
3	2024	TRESPASS	630
4	2024	PUBLIC DISORDERLY CONDUCT	529
5	2024	GENERAL SESSIONS & PROBATE CONTEMPT	506
6	2024	POSS OF A WEAPON DURING VIOLENT OFFENSE	460
7	2024	ASSAULT AND BATTERY 3RD DEGREE	430
8	2024	FIREARM POSSESSION VIOLATIONS	414

Arrests, Diversion, & Deflection

2024 Annual Report

Tricounty Crisis Stabilization Center and Triage Services (TCSC)

Charleston County possesses an array of around the clock community-based options for diversion and deflection from jail. These are appropriate real-time alternatives for individuals living with mental illness, substance use disorders, and/or homelessness. TCSC accepts referrals from local hospitals, mental health providers, Mobile Crisis, local law enforcement, the Charleston Dorchester Mental Health Center, Berkeley Mental Health Center, Charleston County EMS Telehealth, 911 Consolidated Dispatch Center, the Al Cannon Detention Center, the Dorchester County Detention Center, and the Charleston Center.

The TCSC is a community-wide effort collaboratively funded by the South Carolina Department of Mental Health, Charleston Dorchester Mental Health Center, Medical University of South Carolina, Roper Saint Francis, Charleston Center, Trident Medical Center, Charleston County Sheriff's Office, and Berkeley Mental Health Center.

In 2024, TCSC saw a **35% increase** in referrals, and a **57% increase** in admissions.

Familiar Faces

Familiar Faces are individuals who frequently cycle through the jail, being booked and released **three or more times within a two-year period**. In 2024, **836 persons** were identified as a Familiar Face, with **1,929 Bookings** on **3,705 Charges**, utilizing **47,702 Bed Days**. The average length of stay was **25 days**, and on average represented **13%** (130/1006) of the jail's annualized local population (Pretrial and Sentenced). On average, a Familiar Face was 38 years old and most often identified as Male and Black.

Bond & Reentry

BOND AND REENTRY

Definitions

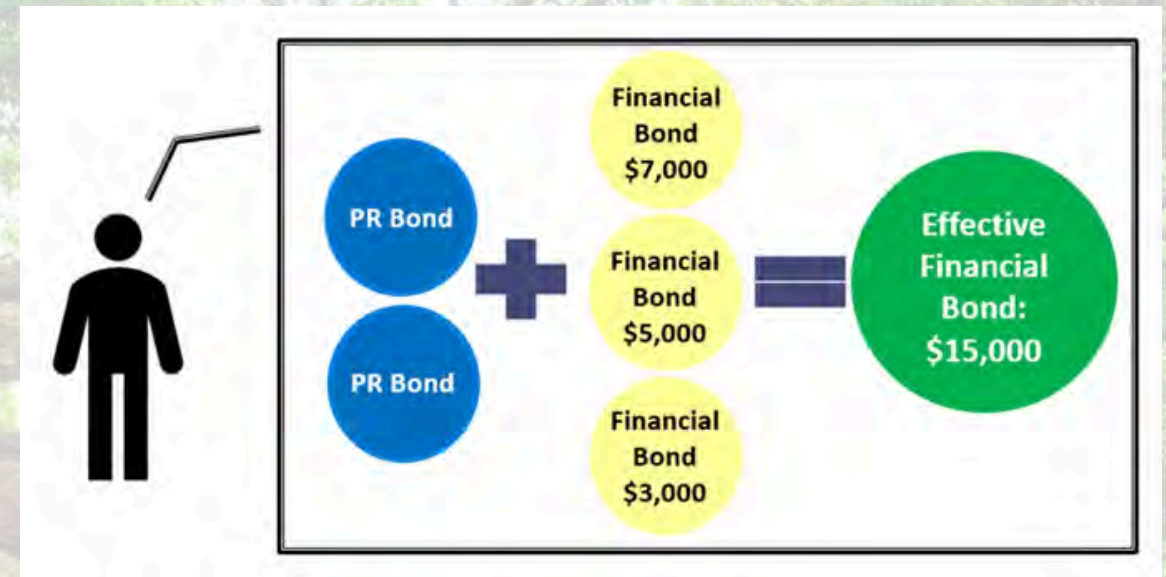

Bail: To procure the release of a person from legal custody, by undertaking that he shall appear at the time and place designated and submit himself to the jurisdiction of the court. - Black's Law Dictionary (2019)

Effective Bond - The combination of all bonds set on an individual per bond hearing. The type and amount of bonds are determined based upon the totality of bonds. An Effective PR bond signifies that only PR bonds were received, whereas an Effective Financial bond could indicate a combination of charges with both financial bonds and PR bond (see image).

Personal Recognizance (P.R.) Bond: Defendant will be released from jail on defendant's promise to appear at court and will not have to pay any money.

Financial Bond: Defendant will be released from jail if the defendant is able to satisfy the total amount of financial bonds, whether they are structured as a cash or surety bond.

Effective Bond Matrix Example

Effective Bond Distribution

Centralized Bond Court

Charges arising within the jurisdiction of General Sessions, County of Charleston, and smaller municipalities within Charleston County will have their bonds set at Centralized Bond Court. The City of North Charleston and City for Charleston set their own municipal level bonds.

In 2024, the number of P.R. Effective Bond distribution marginally decreased **by 1%** compared to 2023, while the number of Financial Effective Bonds **increased by 9.4%** .

P.R. Effective bonds comprised of **27%** of all bonds in **2024**, whereas Financial Effective bonds comprised of **73%**.

Note. Overall figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition

Effective Bond Distribution by Court

Consistent with prior years, Effective Bonds in Summary Court have been predominately driven by PR bonds **(71.2%)**, whereas Effective Bonds in General Sessions have been financially driven **(73.1%)**.

This distribution between courts gives additional insight into the types of charges each court has jurisdiction over, as General Sessions Court sees charges with greater penalties than Summary Court.

Effective Bonds Distribution for Summary Court

Effective Bonds Distribution for General Sessions Court

Note. Overall figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition

BOND AND REENTRY

Average Financial Effective Bond Amount

The overall average effective bond amount across all courts for 2024 was **\$27,634.46**. When further broken down by court type, the average Effective Financial Bond Amount for General Sessions Court in 2024 was **\$31,689** and **\$2,748** for Summary Court. Other court driven bookings, which include bonds set for Federal charges, was **\$24,701**.

Effective Bonds by Year - All Courts

Year	Average Bond Amount
2024	\$27,634.46
2023	\$36,849.82
2022	\$32,728.37
2021	\$35,906.41
2020	\$35,589.83

Note. Overall figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition. "Other" category refers to bonds not set by GSC or Summary Court bookings, and include Federal charges.

BOND AND REENTRY

2024 Annual Report

Pretrial Service Reports (PSR) at Centralized Bond Court Hearings

The **Pretrial Service Report (PSR)** summarizes core information about the defendant for Centralized Bond Court bond hearings provided by the CJCC. The National Association of Pretrial Services Agency's *Standards of Pretrial Release* recommends the use of validated assessments to inform bail decisions. Included within the Pretrial Service Report is the **Charleston County Pretrial Assessment Instrument (CPAI)**. The CPAI ensures Charleston County citizens are provided with an assessment tool uniquely calibrated to the community, and was most recently validated in 2024.

The **CPAI** provides an objective and valid assessment for the likelihood of completing the pretrial period successfully. Pretrial success is defined as not missing required court dates and/or being arrested on a new charge while on pretrial release. Assessment categories are based upon likelihood of success. Levels range from **most likely (Level 1)** to **least likely (Level 4)** to **succeed**.

The PSR does not predict future violence or intentional flight from justice, and is not intended to be the sole factor used in making bond decisions. Judges consider the factors required by law, information provided by the state and defense during the bond hearing, and the PSR prior to rendering a decision appropriate to each individual case. While PSR reports are not limited to General Session charges in Charleston County, **this report reviews only cases where a General Session charge is present.**

BOND AND REENTRY

2024 Annual Report

CPAI Assessment Levels by Bond Type

In **2024**, Financial bonds were most common for each assessment level. This is a change from 2023, where P.R. bonds were reported as the leading bond type for Level 1 (70%). Consistent with 2023, individuals received a P.R. Bond most often when assessed as a Level 1.

CPAI Assessment Levels by Gender

In **2024**, Financial bonds were most common for each assessment level. This is a change from 2023, where P.R. bonds were reported as the leading bond type for Level 1 (70%). Consistent with 2023, individuals received a P.R. Bond most often when assessed as a Level 1.

Note. Assessment Level figures are based upon completed Pretrial Service Reports for eligible candidates with GSC charges.

BOND AND REENTRY

2024 Annual Report

CPAI Assessment Levels by Race

In 2024, Black adults were the most frequently observed Race for each Risk Level Category. White Adults saw the highest number of representation under the Risk Level 1 category (763). Risk Levels 1 and 2 were more racially diverse, whereas Risk Levels 3 and 4 saw less groups overall represented.

Note. Assessment Level figures are based upon completed Pretrial Service Reports for eligible candidates with GSC charges.

BOND AND REENTRY

CPAI Assessment Levels by Age

Adults who fell within the 25-34 Age Category at the time of booking were the most frequently observed group for each Risk Level. The Age Group category of less than 25 (<25) does not include juvenile data, as this information is not included in CJCC's dataset.

Note. Assessment Level figures are based upon completed Pretrial Service Reports for eligible candidates with GSC charges.

BOND AND REENTRY

Pretrial Success Rate Overview

Pretrial Success occurs when an individual has completed the terms of a bond agreement by not incurring new arrest charges (Safety Failure) or by attending all mandated court appearances (Appearance Failure). Though the majority of individuals released are successful (**64.3%**), Risk Level 4's were more likely to see pretrial failure (**55.9%**) than success.

Safety Failure - When a defendant returns to jail before the disposition (conclusion) of a case, for a reason other than a bench warrant (e.g. a new arrest)

Appearance Failure - Occurs when a defendant fails to appear for court, resulting in a bench warrant, failure to appear (FTA) or a Tried in Absentia (TIA) disposition.

Total Failure - is determined by the existence of one or more failure type (Safety and/or Appearance). Total Failure is used to calculate success and failure rate percentage.

CPAI Assessment Level Review						
Risk Level	Total Booking	Safety Failure	Appearance Failure	Total Failure	Any Fail %	Success %
Level 1	6,397	1,077	401	1,373	21.5%	78.5%
Level 2	7,470	2,235	749	2,736	36.6%	63.4%
Level 3	3,598	1,388	466	1,641	45.6%	54.4%
Level 4	1,551	720	249	834	53.8%	46.2%
Total	19,016	5,420	1,865	6,584	34.6%	65.4%

Note. Assessment Level figures are based upon completed Pretrial Service Reports for eligible candidates with GSC charges. Overall figure dates range from January 2020 - December 31, 2024

Pretrial Success Rate Demographics

In examining success rates closer through basic demographic information, it is important to note that none of the information provided indicates predictive capability. Rather, the data shared provides a broader understanding to further describe who has experienced past pretrial successes.

Total	19,016	5,420	1,865	6,584	34.6%	65.4%

Note. Assessment Level figures are based upon completed Pretrial Service Reports for eligible candidates with GSC charges. Overall figure dates range from January 2020 - December 31, 2024

Pretrial Failure Overview

Pretrial Failure occurs when an individual who has been granted bond and is released from the Detention Center violates their bond condition, either by being charged with a new offense or failing to appear before the Court per agreed upon conditions.

The CJCC has monitored the failure and success rates for individuals based on the type of Bond granted and Risk Level using various time parameters.

For the 2024 report, data was examined from January 8, 2020 until December 31, 2024 of cases where a Pretrial Services Report was generated. By identifying circumstances where pretrial failure occurs most often, insight is provided as to where opportunities to support individuals for pretrial success would best be focused.

Consistent with prior CJCC publications, **the majority of bond failures occurred within the first 6 months** following release.

Note. Assessment Level figures are based upon completed Pretrial Service Reports for eligible candidates with GSC charges. Overall figure dates range from January 2020 - December 31, 2024 and are restricted to SACDC booking data.

Pretrial New Arrest Failure by Demographics

Of cases where a Pretrial Services Report was generated, individuals identified as Male, 25-34 years old at the time of booking, and Black have the highest counts across each time period category for experiencing failure (i.e. a new arrest during the pretrial period). Females are observed to most often be arrested on a new charge within the first 6 months, consisted with overall success/failure figures.

Pretrial Failure by Time Period for New Arrests by Race						
Race	0-6 MONTHS	6-12 MONTHS	12-18 MONTHS	18-24 MONTHS	24+ MONTHS	Total
Asian	5		1		1	7
Black	2,713	1,449	915	563	753	6,393

Total	2,127	3,513	2,463	1,652	9,755

Note. Assessment Level figures are based upon completed Pretrial Service Reports for eligible candidates with GSC charges. Overall figure dates range from January 2020 - December 31, 2024 and are restricted to SACDC booking data.

Case Processing

CASE PROCESSING

Case Processing Overview

The CJCC has driven consistent improvements within case processing in Charleston County, including public defender representation in Centralized Bond Court and efficient evidence transfers which supports faster assignment of cases within the Solicitor's office.

Disposition refers to the court's final ruling in a case, essentially bringing a criminal case to its conclusion. A **clearance rate** compares the amount of cases filed (incoming) to cases disposed (outgoing). **Time to Disposition** is a measurement in days between the charge date - usually the day of arrest- and when the case is settled by the court. Disposition status is reported as of December 31, 2024.

Between 2023 and 2024, the amount of total cases disposed **decreased by 15%**, while the number of case filed **increased by 6%**.

Note. This section uses the following data contributors: CMS, SACDC, PbK, and Defender Data. Figures represent General Sessions Court unless otherwise noted. Overall Figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition.

Disposition Activity

Median and **Average** measurements provide a better understanding of how case anomalies may impact overall numbers. For example, a case experiencing significant time between charge and disposition may result in a skewed average, whereas the median (the middle number in a data set) provides insight into where the center value is located by removing extreme outliers. When Medians and Averages are close together, then the data set is considered symmetrical.

The average time to disposition decreased by 10% from 685 days in 2023, to **613 days in 2024**, and the median time to disposition decreased by 23% from 601 days in 2023 to **462 days in 2024**.

Note. Overall Figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition. Time to disposition is calculated from CMS.

Disposition Activity by Type

Disposition Types can include Conviction (Guilty) and Non-Conviction (Not-Guilty or another type of ruling). The most commonly seen **Disposition Descriptions** are Guilty Pleas, Nolle Prosequi (a decision made to not prosecute), and Dismissed Not Indicted (dismissed with no formal charges filed). In 2024, Guilty pleas were the most common disposition observed.

Case Disposition by Description											
Disposition Description	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024

CASE PROCESSING

2024 Annual Report

Front End Indicators

Median and Average Time to Discovery Received

Median and Average Time to PD

Median and Average Time to Solicitor Assignment

Front End Indicators are data points established at the front-end of the criminal court process to track and help expedite case movement. Decreases in front-end indicators support improvements to case processing efficiency, to include case management strategies and the incorporation of technology.

Time to Discovery - The amount of time (in days) for law enforcement to submit case related documents, such as police reports, evidence, and other types of documentation, to the Solicitor's office for review.

Time to Public Defender Assignment - The amount of time (in days) for a Public Defender to be assigned to a case. Public Defenders are not private representation.

Time to Solicitor Assignment - The amount of time (in days) for a Solicitor (Prosecutor) to be assigned to a case.

Note. Overall Figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition.

Total Open Cases

Examining current Open Cases by length of time allows for a better understanding of how pending cases impact the case processing backlog. Similar to differences seen in bookings, charges, and person numbers reported in *Jail Use*, individuals may have multiple cases pending, which may consolidate when disposition occurs.

As of December 31st, 2024 there were 14,780 pending (open) cases. Of those, 8,078 (55%) have been pending over a year. Figures are derived from the Court Management System (CMS) database.

Total Pending Cases

14,780

CMS Pending Cases

CASE PROCESSING

Total Open Cases - Demographics

Demographic information regarding open cases remains consistent with observations made in prior sections of this report. Demographic categories are based on CMS classification. Individuals identified as Male, Black, and between the age of 25-34 at the time of booking, represent the majority of open cases.

Total Pending Cases

14,780

CMS Pending Cases

Open Cases by Gender

Gender ● Female ● Male ● Other

Open Cases by Defendant Age Category

Age Category ● <25 ● 25-34 ● 35-44 ● >44

Open Cases by Race

Race ● Black ● Other ● White

Note. Overall Figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition. Open case status is captured as of December 31, 2024. Race categories are based on CMS classification.

CASE PROCESSING

Open Cases by Custody Status

Custody Status refers to how an individual is awaiting a final decision by the court, whether jailed (**In-Custody**) or not (**Out of Custody**). An **Out of Custody** status could indicate incarceration occurred at the initial booking process, for example, a defendant booked into the detention center and subsequently released on bond, or a non-custodial arrest where a defendant is not admitted to jail. Similarly, an **In-Custody** status could indicate an individual who had been previously been out of custody, but returned to jail due to a violation. The majority of open cases involve defendants who have an **Out of Custody** status. Open cases do not reflect the distinct number of individuals, as one individual could have multiple open cases.

Total CMS Open Cases by Custody Status		
Year	CMS Pending Cases	CustodyStatus
2024	2,122	In-Custody
2024	4,620	Out-Custody
2023	615	In-Custody
2023	3,040	Out-Custody
2022	351	In-Custody
2022	2,043	Out-Custody
2021	239	In-Custody
2021	1,139	Out-Custody
2020	96	In-Custody
2020	373	Out-Custody
2019	15	In-Custody
2019	94	Out-Custody
2018	2	In-Custody
2018	19	Out-Custody
Total	14,768

CASE PROCESSING

Time to Disposition by Custody Status (Average)

Time to Disposition is a measurement (in days) between the charge date and when the case is settled by the court. For this section, **Average** and **Median Time to Disposition** numbers are generated from combining detention center data (SACDC) and Court Management System data (CMS) where custody status is present. Through the joining of two different sources, marginal differences are seen in overall median and average values.

In Custody and Out of Custody disposition categories reflect similar distributions of demographics of Gender, Race, and Age.

Average Time to Disposition by Gender

Year	Gender	In-Custody	Out-Custody	All-Custody
2024	Female	152	672	574
2024	Male	278	682	559
2024	Other		1,647	924

Average Time to Disposition by Race

Year	Race	In-Custody	Out-Custody	All-Custody
2024	Black	277	704	582
2024	Other	266	589	493
2024	White	243	645	528

Average Time to Disposition by Age Category

Year	In-Custody	Out-Custody	All-Custody	Age Category
2024	291	661	580	<25
2024	286	718	595	25-34
2024	221	656	523	35-44
2024	265	675	534	>44

Note. Overall Figures reported may marginally fluctuate between reporting years due to data storage methods and case disposition. Demographic categories are based on CMS classification and are not self-reported.

WHAT TO EXPECT IN 2025

The progress made in 2024 reflects the ongoing dedication of CJCC members, community stakeholders, and partners in building a safer, more just society for all. As we continue to evaluate and refine our efforts, the CJCC remains focused on promoting a system that is fair, efficient, and equitable for all members of the community.

This report outlines our progress in the pursuit of these goals and provides insight into the next steps as we move forward in 2025.

This report was created with support from the Charleston County Department of Public Safety and the John D. and Catherine T. MacArthur Foundation as part of the Safety and Justice Challenge.
